Magnecraft time delay and sensor relays are designed to provide cost effective solutions for your industrial timing and sensing needs. Available in a wide array of forms, fits and functions, Magnecraft timers offer the ultimate in flexibility and performance. Accurate adjustments, legible wiring diagrams and an interactive timer demo make selection quick and easy.

## Key Features

- Multiple timing functions
- Wide voltage range from 12 to 240 V
- Single timing range or from 100 ms to 10 days
- DIN or Panel mounting styles
- Conforms to international standards including UL, CSA, RoHS and CE IEC

Description

Magnecraft Time Delay and Sensor Relays  
820 Series  
SPDT, 15 A; DPDT, 15 A

Description

The 820 Series Time Delay Relays are 35 mm DIN rail mountable products offering 10 different timing functions, ultra-wide timing range (10 ms to 10 days) and a universal voltage input (12-240 Vac/Vdc), all in a slim 17.5 mm (0.69 in) modular package.

Feature	Benefit
Up to 10 functions	5 timing functions controlled via supply voltage 4 timing functions controlled via trigger input 1 function of memory latching Meets most timing requirements
Contact configuration	SPDT or DPDT
Universal power supply	12 to 240 Vac/Vdc
2 LED status indicators	Shows status at a glance
Only 17.5 mm (0.69 in) wide	Ideal for tight spaces
DIN rail mountable	Easy installation / Screwdriver required
RoHS compliant	Environmentally friendly

## Description

The 831 voltage sensor is a single-phase AC voltage sensing device that is capable of monitoring and reacting to over and under voltage conditions. This product is designed to be wired across terminals A1 and A2 with the voltage that is being monitored. The two LED lamps indicate both when the input voltage is present (Green LED) and also when the output is energized (Red LED). The Umax dial is used to set the upper trip-point for the voltage sensor. The Umin dial is a percentage of the Umax dial and is used to set the lower trip-point for the voltage sensor. The timing dial is used to delay the transfer of the contacts, from 0 to 10 seconds, when a set point has been violated.

Feature	Benefit
3-state indication LEDs	Indicates normal state and 2 types of faulted states
Timing dial	Adjustable delay 0-10 sec
DIN mountable	Mounts directly on 35 mm DIN rail
Current rating is 15A @ 240 Vac, 24 Vdc	High switching capacity
Only 17.5 mm (0.69 in) wide	Ideal for tight spaces

Magnecraft Time Delay and Sensor Relays

841 Series  
SPDT, 15 A

841 Relay

Description

Current sensing relay which allows the user to monitor the current of one circuit (1 to 8 A) and switch another circuit in case of an over current condition; all in a modular, Fingersafe (according to IEC 60529 IP rating) package.

Feature	Benefit
Current sensing adjustment knob	Sense anywhere from 10% to 100% of the rated sensing current
Input/ouput terminals	Accepts up to a 14 AWG Wire
Solid state circuitry	Used for precise sensing and timing control
Input/output indication	Shows status at a glance
DIN rail mountable	Mounts directly on a DIN Rail
Only 17.5 mm (0.69 in) wide	Ideal for tight spaces
Wide input range	Enabled to work with common AC voltages.

70-782EL14-1 Socket

16-TDR782SC Spring Clip

### Description

The TDR782 accessories create a complete system solution for all your application needs. The 70-782EL socket offers an alternate installation option for plug-in models. The 16-TDR782SC retention clip holds the relay securely in place while allowing quick and efficient installation and maintenance.

TDRPRO Relay

## Description

Time delay relays that are programmable, multi-function, multi-voltage, and socket-compatible - offering the user the ultimate in design flexibility. The thumb wheel adjustment dials result in no mechanical deviation for supreme accuracy.

Feature	Benefit
Up to 10 functions	5 Timing functions controlled via supply voltage 4 Timing functions controlled via trigger input 1 function of memory latching
Broad timing range	0.1 Seconds to 9990 hours
Panel mount adapter	Panel mountable
Dust cover	Retains settings / keeps dust out
Universal power supply	12 – 240 Vac/Vdc
Thumb wheel adjustment for function / timing	Helps ensure accuracy and reduces timing deviations
2 LED status indicators	Indicate coil power / timing out / output state
RoHS compliant	Environmentally friendly

Input Voltage	Functions Available (1)	Timing Range	Contact Configuration	Rated Current (A)	Standard Part Number
12 to 240 Vac/Vdc	A,B,C,D,E,F,G,H,I,J	100 ms to 9990 hrs	DPDT	12	TDRPRO-5100
12 to 240 Vac/Vdc	A,B,C,D,E,F,G,H,I,J	100 ms to 9990 hrs	SPDT	12	TDRPRO-5101
12 to 240 Vac/Vdc	A,B,C	100 ms to 9990 hrs	DPDT	12	TDRPRO-5102

## Time Delay Relay Functions: Power Trigger

Function	Description	Timing Chart	Relays
<b>On Delay (A)</b>	When the input voltage <b>U</b> is applied, timing delay <b>T</b> begins. Relay contacts <b>R</b> change state after time delay is complete. Contacts <b>R</b> return to their shelf state when input voltage <b>U</b> is removed. Trigger switch is not used in this function.		821, 822, TDR782, TDRPRO-5100, TDRPRO-5101, TDRPRO-5102, 831, 841
<b>Repeat Cycle: Starting Open (B)</b>	When input voltage <b>U</b> is applied, time delay <b>T</b> begins. When time delay <b>T</b> is complete, relay contacts <b>R</b> change state for time delay <b>T</b> . This cycle will repeat until input voltage <b>U</b> is removed. Trigger switch is not used in this function.		821, 822, TDRPRO-5100, TDRPRO-5101, TDRPRO-5102
<b>Interval (C)</b>	When input voltage <b>U</b> is applied, relay contacts <b>R</b> change state immediately and timing cycle begins. When time delay <b>T</b> is complete, contacts return to shelf state. When input voltage <b>U</b> is removed, contacts will also return to their shelf state. Trigger switch is not used in this function.		821, 822, TDRPRO-5100, TDRPRO-5101, TDRPRO-5102
<b>Repeat Cycle: Starting Closed (F)</b>	When input voltage <b>U</b> is applied, relay contacts <b>R</b> change state immediately and time delay <b>T</b> begins. When time delay <b>T</b> is complete, contacts return to their shelf state for time delay <b>T</b> . This cycle will repeat until input voltage <b>U</b> is removed. Trigger switch is not used in this function.		821, 822, TDRPRO-5100, TDRPRO-5101
<b>Pulse Generator (G)</b>	Upon application of input voltage <b>U</b> , a single output pulse of 0.5 seconds is delivered to relay after time delay <b>T</b> . Power must be removed and reapplied to repeat pulse. Trigger switch is not used in this function.		821, 822, TDRPRO-5100, TDRPRO-5101

## Magnecraft Time Delay and Sensor Relays

---

### Definition

A time delay is defined as the controlled period between the functioning of two events. A time delay relay is a combination of an electromechanical output relay and a control circuit. The control circuit is comprised of solid state components that control operation of the relay and timing range. Typical time delay functions include On-Delay, Repeat cycle (starting off), Interval, Off-Delay, Retriggerable One Shot, Repeat cycle (starting on), Pulse Generator, One Shot, On/Off Delay, and Memory Latch. Each function is explained in the tables on pages 30 and 31. Time delay relays have a broad choice of timing ranges from less than one second to many days. There are many choices of timing adjustments from calibrated external knobs, DIP switches, thumbwheel switches, or recessed potentiometer.

### Principle of Operation

Time delay relays are simply control relays with a time delay built in. Their purpose is to control an event based on time. The difference between relays and time delay relays is when the output contacts open & close: on a control relay, it happens when voltage is applied and removed from the coil; on time delay relays, the contacts will open or close before or after a pre-selected, timed interval.

Typically, time delay relays are initiated or triggered by one of two methods:

- application of input voltage (On Delay, Interval On, Flasher, Repeat Cycle, Delayed Interval & Interval/Flasher).
- opening or closing of a trigger signal (Off Delay, Single Shot & Watchdog).

These trigger signals can be one of two designs:

- a control switch (dry contact), i.e., limit switch, push button, float switch, etc.
- voltage (commonly known as a power trigger).

Definitions:

**Input Voltage:** Control voltage applied to the input terminals (see wiring diagrams below). Depending on the function, input voltage will either initiate the unit or make it ready to initiate when a trigger signal is applied.

**Trigger Signal:** On certain timing functions, a trigger signal is used to initiate the unit after input voltage has been applied. As noted above, this trigger signal can either be a control switch (dry contact switch) or a power trigger (voltage).

**Output (Load):** Every time delay relay has an internal relay (usually mechanical) with contacts that open & close to control the load. They are represented by the dotted lines in the wiring diagrams. Note that the user must provide the voltage to power the load being switched by the output contacts of the time delay relay.

## Applications

Magnecraft time delay and sensor relays are designed to provide cost effective solutions for your industrial timing and sensing needs. Available in a wide array of forms, fits and functions; Magnecraft timers offer flexibility and performance for process control and industrial building applications.

### Typical Examples of Timer Applications

#### Automation Panels

Process controls, motor controls, emergency lighting

#### Food & Beverage

Commercial/industrial cooking equipment, filtration systems, bottling, chillers, convection ovens

#### Packaging Machinery

Conveyor motors, food processors, product/shrink wrap, solenoid controls

#### Lighting Control

Traffic signal systems, motorway information systems, theatrical lighting, ballast lighting

#### Power Supplies

Universal power supplies, battery backup systems

#### Material Handling

Motor control, conveyor controls

#### HVAC & Refrigeration

Anti-condensation equipment, compressor controls, blower controls, motorized duct/vent controls

#### Appliances

Air conditioners, water heaters, portable heaters, spa controls, water pumps

# Magnecraft Time Delay and Sensor Relays

The Magnecraft website ([www.serelays.com](http://www.serelays.com)) is designed to enable users to easily find the proper relay to fit design requirements and to help simplify and shorten workflow.

## Easily find the proper relay to fit design requirements

### Online Catalog

Find the right product by choosing specifications, compare products side-by-side, and view technical specifications, 2D and 3D drawings, and associated accessories.

### Cross Reference Search

Search our comprehensive database to identify products by manufacturer and part number, and link directly to part specifications.

### 3D CAD Library

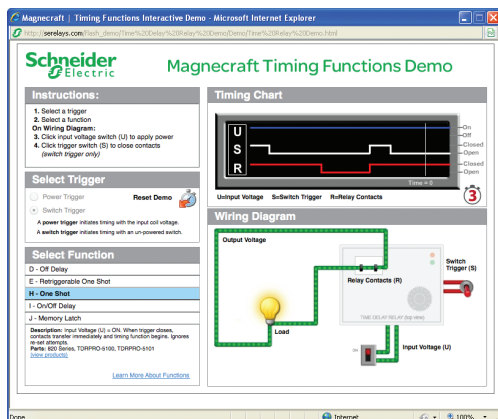

View, email, download, or insert a file directly into your open CAD software. There are 18 different file formats to choose from.

### Order Free Samples

Magnecraft offers free samples as a courtesy to individuals and companies evaluating our products for their designs and applications. Sample orders are subject to approval.
