

MICROCHIP

**RN1810 PICtail™/PICtail Plus
Daughter Board
User's Guide**

Note the following details of the code protection feature on Microchip devices:

- Microchip products meet the specification contained in their particular Microchip Data Sheet.
- Microchip believes that its family of products is one of the most secure families of its kind on the market today, when used in the intended manner and under normal conditions.
- There are dishonest and possibly illegal methods used to breach the code protection feature. All of these methods, to our knowledge, require using the Microchip products in a manner outside the operating specifications contained in Microchip's Data Sheets. Most likely, the person doing so is engaged in theft of intellectual property.
- Microchip is willing to work with the customer who is concerned about the integrity of their code.
- Neither Microchip nor any other semiconductor manufacturer can guarantee the security of their code. Code protection does not mean that we are guaranteeing the product as "unbreakable."

Code protection is constantly evolving. We at Microchip are committed to continuously improving the code protection features of our products. Attempts to break Microchip's code protection feature may be a violation of the Digital Millennium Copyright Act. If such acts allow unauthorized access to your software or other copyrighted work, you may have a right to sue for relief under that Act.

Information contained in this publication regarding device applications and the like is provided only for your convenience and may be superseded by updates. It is your responsibility to ensure that your application meets with your specifications. MICROCHIP MAKES NO REPRESENTATIONS OR WARRANTIES OF ANY KIND WHETHER EXPRESS OR IMPLIED, WRITTEN OR ORAL, STATUTORY OR OTHERWISE, RELATED TO THE INFORMATION, INCLUDING BUT NOT LIMITED TO ITS CONDITION, QUALITY, PERFORMANCE, MERCHANTABILITY OR FITNESS FOR PURPOSE. Microchip disclaims all liability arising from this information and its use. Use of Microchip devices in life support and/or safety applications is entirely at the buyer's risk, and the buyer agrees to defend, indemnify and hold harmless Microchip from any and all damages, claims, suits, or expenses resulting from such use. No licenses are conveyed, implicitly or otherwise, under any Microchip intellectual property rights unless otherwise stated.

Microchip received ISO/TS-16949:2009 certification for its worldwide headquarters, design and wafer fabrication facilities in Chandler and Tempe, Arizona; Gresham, Oregon and design centers in California and India. The Company's quality system processes and procedures are for its PIC® MCUs and dsPIC® DSCs, KEELOQ® code hopping devices, Serial EEPROMs, microperipherals, nonvolatile memory and analog products. In addition, Microchip's quality system for the design and manufacture of development systems is ISO 9001:2000 certified.

Object of Declaration: RN1810 PICtail™/PICtail Plus Daughter Board

EU Declaration of Conformity

Manufacturer: Microchip Technology Inc.
2355 W. Chandler Blvd.
Chandler, Arizona, 85224-6199
USA

This declaration of conformity is issued by the manufacturer.

The development/evaluation tool is designed to be used for research and development in a laboratory environment. This development/evaluation tool is not intended to be a finished appliance, nor is it intended for incorporation into finished appliances that are made commercially available as single functional units to end users. This development/evaluation tool complies with EU EMC Directive 2004/108/EC and as supported by the European Commission's Guide for the EMC Directive 2004/108/EC (8th February 2010).

This development/evaluation tool complies with EU RoHS2 Directive 2011/65/EU.

This development/evaluation tool, when incorporating wireless and radio-telecom functionality, is in compliance with the essential requirement and other relevant provisions of the R&TTE Directive 1999/5/EC and the FCC rules as stated in the declaration of conformity provided in the module datasheet and the module product page available at www.microchip.com.

For information regarding the exclusive, limited warranties applicable to Microchip products, please see Microchip's standard terms and conditions of sale, which are printed on our sales documentation and available at www.microchip.com.

Preface

NOTICE TO CUSTOMERS

All documentation becomes dated, and this manual is no exception. Microchip tools and documentation are constantly evolving to meet customer needs, so some actual dialogs and/or tool descriptions may differ from those in this document. Please refer to our website (www.microchip.com) to obtain the latest documentation available.

Documents are identified with a “DS” number. This number is located on the bottom of each page, in front of the page number. The numbering convention for the DS number is “DSXXXXXXXXA”, where “XXXXXXXX” is the document number and “A” is the revision level of the document.

For the most up-to-date information on development tools, see the MPLAB® IDE online help. Select the Help menu, and then Topics to open a list of available online help files.

INTRODUCTION

This chapter contains general information that will be useful to know before using the RN1810 PICtail™/PICtail Plus Daughter Board. Items discussed in this chapter include:

- [Document Layout](#)
- [Conventions Used in this Guide](#)
- [Recommended Reading](#)
- [The Microchip Website](#)
- [Development Systems Customer Change Notification Service](#)
- [Customer Support](#)
- [Document Revision History](#)

DOCUMENT LAYOUT

This document describes how the RN1810 PICtail/PICtail Plus Daughter Board allows the designer to evaluate and demonstrate the capabilities of the RN1810 module. The document is organized as follows:

- **Chapter 1. “Overview”** – This chapter contains the RN1810 PICtail/PICtail Plus Daughter Board description.
- **Chapter 2. “Getting Started”** - This chapter provides a quick overview of the RN1810 PICtail/PICtail Plus Daughter Board.
- **Appendix A. “Board Schematic”** – This appendix provides the RN1810 PICtail/PICtail Plus Daughter Board schematic.

CONVENTIONS USED IN THIS GUIDE

This manual uses the following documentation conventions:

DOCUMENTATION CONVENTIONS

Description	Represents	Examples
Arial font:		
Italic characters	Referenced books	<i>MPLAB® IDE User's Guide</i>
	Emphasized text	...is the <i>only</i> compiler...
Initial caps	A window	the Output window
	A dialog	the Settings dialog
	A menu selection	select Enable Programmer
Quotes	A field name in a window or dialog	"Save project before build"
Underlined, italic text with right angle bracket	A menu path	<u>File>Save</u>
Bold characters	A dialog button	Click OK
	A tab	Click the Power tab
N'Rnnnn	A number in verilog format, where N is the total number of digits, R is the radix and n is a digit.	4'b0010, 2'hF1
Text in angle brackets < >	A key on the keyboard	Press <Enter>, <F1>
Courier New font:		
Plain Courier New	Sample source code	#define START
	Filenames	autoexec.bat
	File paths	c:\mcc18\h
	Keywords	_asm, _endasm, static
	Command-line options	-Opa+, -Opa-
	Bit values	0, 1
	Constants	0xFF, 'A'
Italic Courier New	A variable argument	<i>file.o</i> , where <i>file</i> can be any valid filename
Square brackets []	Optional arguments	mcc18 [options] <i>file</i> [options]
Curly brackets and pipe character: { }	Choice of mutually exclusive arguments; an OR selection	errorlevel {0 1}
Ellipses...	Replaces repeated text	var_name [, var_name...]
	Represents code supplied by user	void main (void) { ... }

RECOMMENDED READING

This user's guide describes how to use RN1810 PICtail/PICtail Plus Daughter Board. Other useful documents are listed below. The following Microchip document(s) are recommended as supplemental reference resources.

RN1810/RN1810E 2.4 GHz IEEE 802.11b/g/n Wireless Module Data Sheet (DS50002460A)

This document provides the technical specifications for the RN1810/RN1810E modules and is available for download from the Microchip website (www.microchip.com)

RN1810 WiFly Command Reference User's Guide (DS50002467A)

This document provides information for configuring the RN1810 module including a command reference, advanced features, and application examples.

THE MICROCHIP WEBSITE

Microchip provides online support via our website at www.microchip.com. This website is used as a means to make files and information easily available to customers. Accessible by using your favorite Internet browser, the website contains the following information:

- **Product Support** – Data sheets and errata, application notes and sample programs, design resources, user's guides and hardware support documents, latest software releases and archived software
- **General Technical Support** – Frequently Asked Questions (FAQs), technical support requests, online discussion groups, Microchip consultant program member listing
- **Business of Microchip** – Product selector and ordering guides, latest Microchip press releases, listing of seminars and events; and listings of Microchip sales offices, distributors and factory representatives

DEVELOPMENT SYSTEMS CUSTOMER CHANGE NOTIFICATION SERVICE

Microchip's customer notification service helps keep customers current on Microchip products. Subscribers will receive e-mail notification whenever there are changes, updates, revisions or errata related to a specified product family or development tool of interest.

To register, access the Microchip website at www.microchip.com, click on Customer The Development Systems product group categories are:

- **Compilers** – The latest information on Microchip C compilers and other language tools
- **Emulators** – The latest information on the Microchip MPLAB[®] REAL ICE[™] in-circuit emulator
- **In-Circuit Debuggers** – The latest information on the Microchip in-circuit debugger, MPLAB ICD 3
- **MPLAB X IDE** – The latest information on Microchip MPLAB X IDE, the Windows[®] Integrated Development Environment for development systems tools
- **Programmable** – The latest information on Microchip programmers including the PICkit[™] 3 development programmer

CUSTOMER SUPPORT

Users of Microchip products can receive assistance through several channels:

- Distributor or Representative
- Local Sales Office
- Field Application Engineer (FAE)
- Technical Support

Customers should contact their distributor, representative or field application engineer (FAE) for support. Local sales offices are also available to help customers. A listing of sales offices and locations is included in the back of this document.

Technical support is available through the website at:

<http://www.microchip.com/support>.

DOCUMENT REVISION HISTORY

Revision A (March 2016)

This is the initial release of this document.

Chapter 1. Overview

1.1 INTRODUCTION

The RN1810 PICtail™/PICtail Plus Daughter Board is a demonstration board that showcases the Microchip RN1810 Certified WiFly module, a low-cost IEEE 802.11b/g/n Wi-Fi® Transceiver module. The high-speed UART interface and the I/O pins are available on the RN1810 module to configure, control, and transfer data.

The RN1810 PICtail Plus Daughter Board has PICtail Plus and PICtail connectors to interface with a PIC® Microcontroller (MCU) on the development boards that support PICtail Plus or PICtail interface with the required pin mapping. The PICtail board also has an MCP2200 USB bridge to enable easy serial connection to a PC over USB.

This document must be used in conjunction with the “RN1810 WiFly Command Reference User’s Guide” (DS50002467A).

1.2 FEATURES

- Microchip RN1810 IEEE 802.11b/g/n Compliant Transceiver
- PICtail Plus Daughter Board or PICtail Daughter Board Connection Interfaces
- MCP2200 USB Bridge and connector for stand-alone UART terminal operation
- Status LEDs, **Reset** button, and **Function** button

1.3 BOARD CONFIGURATION

Jumper positions on the RN1810 PICtail™/PICtail Plus Daughter Board are as follows:

- Jumper JP5 must be shorted
- Jumpers JP2 and JP3 must be open
- Jumper JP1 must be configured as follows:
 - must be shorted when the PICtail is operating stand-alone (only powered via USB cable)
 - must be open when the PICtail is connected to the Microchip development board

Table 1-1 provides the list of LEDs on the daughter board with its corresponding color description and pin connection.

TABLE 1-1: RN1810 LED DESCRIPTION

LED	Color	Description
PWR	Green	Turned on when the RN1810 is powered
TX	Green	Connected to UART0_TX
RX	Green	Connected to UART0_RX
D1	Yellow	Connected to IP_STATUS I/O
D2	Blue	Connected to TCP_STATUS I/O
D3	Green	Connected to CMD_STATUS I/O
D4	Red	Connected to MISC_STATUS I/O

RN1810 PICtail™/PICtail Plus Daughter Board User's Guide

Table 1-2 provides a brief description of the buttons on the board.

TABLE 1-2: RN1810 BUTTONS

Button ⁽¹⁾	Description
Reset	Performs a Module Reset.
Function	Connected to FUNC_CONFIG pin which is low by default. Pressing the button sets the FUNC_CONFIG pin high.

Note 1: Refer to the “RN1810 WiFly Command Reference User's Guide” (DS50002467A) for a detailed description of the I/O pins connected to the module's LEDs and buttons.

Figure 1-1 shows the RN1810 PICtail™/PICtail Plus Daughter Board with the **Reset** button on the top left side and the **Function** button below it. On the right-hand side, lined up vertically, are the four LEDs.

FIGURE 1-1: RN1810 PICtail™/PICtail PLUS DAUGHTER BOARD

Chapter 2. Getting Started

2.1 OVERVIEW

The RN1810 module on the RN1810 PICtail/PICtail Plus Daughter Board exposes a high speed UART interface which can be used to issue ASCII commands to configure and control the RN1810 module. For more information on the RN1810 commands, configuration and examples, refer to the “*RN1810 WiFly Command Reference User's Guide*” (DS50002467A).

While in PICtail mode, the board can be plugged into any standard Microchip development board that supports the PICtail Plus or PICtail connection interface.

Note: Ensure that the PICtail connector pin-out on the host MCU development platform supports the pin-out on the PICtail interface on the RN1810 PICtail/PICtail Plus Daughter Board.

The firmware running on the Microchip 8/16/32-bit PIC MCU can be used to interface over UART and I/O ports with the RN1810 on the PICtail board. Refer to the **Section 2.2 “Other Information”** for information about downloading PIC workspaces for PICtail mode.

When the RN1810 PICtail/PICtail Plus Daughter Board is first connected to a PC via the USB cable, the PC automatically downloads the MCP2200 USB driver. Alternatively, the MCP2200 driver can be downloaded and installed directly from the Microchip web page at <http://www.microchip.com/wwwproducts/en/en546923>.

While in MCP2200 UART Bridge mode, the board can be connected via a Micro-USB cable to a PC that supports serial COM ports where the board immediately enumerates a serial COM port. A terminal emulator application on the PC can be used to open the COM port and issue commands when the RN1810 is in Command mode, or to transfer data when the RN1810 is in Data mode. Typing \$\$\$ while in Data mode transitions the module to Command mode. There is a 250 ms guard band duration to enter Command mode. The Command mode is entered only if each dollar sign character (\$) is entered within 250 ms interval, and no other characters are received by the module 250 ms before the first and after the last \$.

Application examples can be found in *Chapter 4, Application Examples* of the “*RN1810 WiFly Command Reference User's Guide*” (DS50002467A).

2.2 OTHER INFORMATION

To obtain the most recent and complete RN1810 Data Sheet, User's Guide and code examples, visit the Microchip website: www.microchip.com/RN1810.
