CIRCULAR PLASTIC CONNECTORS

for Commercial Signal & Power Applications

APPLICATIONS FOR CIRCULAR PLASTIC CONNECTORS

CONTROL CABINET

ROBOTICS

MOLDING MACHINE

MACHINE TOOL

Circular Plastic Connectors are rugged, cost-effective connectors that can be used to provide power input and output to and from virtually any device. It's commonly used in Energy Management Systems, Power Generators, Material handling, Agriculture Equipment, Battery Management systems, Industrial machinery, Rolling Stock, Forklifts, Welding Equipment, Robotics, Construction equipment, Power Supplies, Industrial Scales and Weighting, etc.

The use of Circular Plastic Connectors enables customers to reduce installation time, meet harsh and space saving requirements, design with high-performance materials, and speed up their go-to-market plans.

Introduction

Product Facts

- Lightweight, all-plastic and metal-shell connectors
- CPC connectors are UL 94V-0 rated and made of stabilized, heat resistant, self extinguishing thermoplastic material
- Metal-shell CPC connector housings made of UL 94V-0 rated thermoplastic
- Operating temperature range: -40°C to +105°C
- Available in panel or chassis mount and free-hanging configurations
- Quick connect/disconnect capability with thread assist, positive detent coupling
- Built-in pin and socket protection
- Polarized for proper mating of connector halves
- Special connector configurations offer special solder and posted contacts, special receptacles with or without threaded inserts
- Full complement of optional accessories
- Recognized under the Component Program of Underwriters Laboratories Inc. (VAC, RMS or VDC, Service): Series 1 600 V, Series 2 250 V, Series 3 600 V, Series 4 600 V, Series 5 250 V, Series 6 250 V, File No. E28476

• Certified by Canadian Standards Association, File No. LR 7189

• Produced under a Quality Management System certified to ISO 9001

A copy of the certificate is available upon request.

• Certain products meet VDE Standard 062

Six connector series for different interconnection requirements:

- Series 1 – Standard density, signal and low-current applications using durable Multimate contacts (.062 [1.57] pin diameter)
- Series 2 – High density applications using Size 20 DM and 20 DF contacts (.040 [1.02] pin diameter)
- Series 3 – Low density, power applications with Type XII contacts capable of carrying up to 25 amperes of current
- Series 4 – Combination of standard and power density application with Type III+ and Type XII contacts
- Series 5 – Power density application with Size 8 screw machined and precision formed contacts
- Series 6 – Combination of standard and power density application with Type III+ and Size 8 contacts

MIL-C-5015 Style Circular Plastic Connectors (CPC) Product Facts

- Intermateable with Metal-Shell sizes 20-14 and 18-10, MIL-C-5015 Style connectors
- High impact resistant plastic housing made of UL 94V-0 rated material
- Lightweight
- Lower cost than standard MIL-C-5015 connectors
- Industry accepted Type III+ pin and socket contacts, available on reels in strip form for high volume, low cost, automatic machine terminations, or in loose piece form for low volume, prototype or maintenance and repair
- Improved alignment (U.S. Standard MIL-C-5015 Connectors) prevents mismatching with other housing insert arrangements
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476
- Certified by Canadian Standards Association, File No. LR 7189

Miniature CPC Connectors Product Facts

- Compact, high contact density, environmentally sealed connectors
- Uses existing Mini-Universal MATE-N-LOK stamped and formed pin and socket contacts
- Two shell sizes – available in 1 to 4 and 5 to 9 position configurations

Product Environmental Compliance and Sustainability is embedded into the design process from the product ideation phase and continuing throughout the production process and is an important element of conducting our business in an environmentally friendly manner which meets both global environmental legislation and related customer content requirement for products purchased from TE Connectivity. We take environmental compliance very seriously and strive to understand, through our global network of compliance experts, the ever evolving impact of new and changing legislation (e.g., RoHS2 (Dir. 2011/65 EU)

as well as obligations regarding REACH or Registration, Evaluation, Authorization and Restriction of Chemicals, (Reg (EC) No 1907/2006 and amendments). These two key EU based directives, are just two of the many other significant environmental laws and related restrictions impacting the electronics industry which are met every day across our vast portfolio, irrespective of where the product may be manufactured around the globe; both by TE Connectivity or by our valued suppliers. We at TE Connectivity understand and appreciate that product environmental compliance is important to you and so we have

structured our compliance web site in friendly manner that will allow you to explore selected key topics, some of which are listed here, should you require further information.

Disclaimer:
Not all TE Connectivity product meets RoHS, as some industries – (Mil-Aero, for instance), require lead containing product in certain applications. Additionally, some product is classified as “out-of-scope” such as hand tools, non-electrical accessories, marketing literature, etc. Products in this catalog are RoHS compliant unless indicated otherwise.

Connector Series and Types

Series 1 – Size 16 Contacts

Series 1 connectors permit the use of multiple combinations of signal and coaxial circuits in the same housing by accepting durable Multimate contacts. These pin and socket contacts include Type III+ and

subminiature coaxial contacts, interchangeable in the same Multimate contact cavity. Type III+ contacts (.062 [1.57] pin diameter) are capable of carrying a maximum of 13 amperes when crimped in wire.

Type III solder contacts and posted contacts for pc board applications are also available. Many connector arrangements offer both standard and reverse sex contact loading – **from 4 thru 37 positions.**

Series 2 – Size 20 Contacts

Series 2 connectors accept Size 20 DF (precision formed) and Size 20 DM (screw-machined) pin and socket contacts with a .040 [1.02] pin diameter. Size 20 DF contacts are available in crimp and solder versions, as well as a posted version for wrap-type and

pc board applications. Maximum current carrying capability is 7.5 amperes. Many connector arrangements offer both standard and reverse sex contact loading – **from 8 thru 63 positions.**

Series 3 – Power Contacts

Series 3 connectors accept Type XII power contacts which can carry up to 25 amps per contact. These contacts will accommodate a wire size range of 16 to 10 AWG [1.4 to 5 mm²].

Two connector sizes are available in both standard and reverse sex connector arrangements **3 and 7 positions.**

Series 4 – Combination, Size 16 and Power Contacts

Series 4 connectors accept Size 16 Multimate and Type XII power contacts, combining the signal and coaxial circuit capabilities of Series 1 connectors with the power circuit capabilities of Series 3 connectors.

Available in three connector sizes offering power mixing combinations totaling **13, 16 and 22 positions.**

Series 5 – Power Contacts .125 POWERBAND

Series 5 connectors combine the revolutionary performance of the new AMP POWERBAND Contact, high current contact in configurations similar to the Series 3 connectors. AMP POWERBAND contacts offer the electrical performance of

the best Mil Spec Size 8 screw-machined contacts with the economy and productivity of strip-fed, precision formed contacts. Series 5 connectors are environmentally sealable to meet IEC IP 65 and IP 67 specifications.

Rated at 250 VAC or VDC, 50 amperes maximum in a single contact, the connectors are available in free-hanging and panelmount applications – **one connector configuration containing three .125 POWERBAND contacts.**

Series 6 – Combination, Size 16 and .125 POWERBAND Contacts

Series 6 combines the high current and environmental sealing capability of Series 5, POWERBAND contacts, and the reliability of signal carrying, low current Type III+ contacts. This combination of power and

signal contacts is offered in **one connector configuration containing two .125 POWERBAND contacts and eight Type III+ signal pin and socket contacts.**

MIL-C-5015 Style – Size 16 Contacts

This new addition to the AMP Circular Plastic Connector Line is specifically designed to be **intermateable with Metal-Shell size 20-14 and 18-10, MIL-C-5015 Style connector systems.** The high impact resistant plastic housing offers the advantages of

light weight and lower cost than existing metal-shell connectors. In addition the connector design prevents mismating when used with other insert arrangements. As part of the AMP Multimate family of connectors, the MIL-C-5015 style connector

offers the economies of crimp Type III+ pin and socket contacts in reel-mounted, strip-form for high volume automatic machine termination, as well as in loose piece-form for low volume, prototype or maintenance and repair.

Metal-Shell, Circular Plastic Connectors

Metal-Shell CPC connectors consist of a black thermoplastic insert in a nickel-plated, zinc alloy shell. These connectors are currently available in **shell**

sizes 14, 22 and 28, and in two basic configurations consisting of plugs and square flange receptacles.

Miniature CPC Connectors

These compact connectors accept existing Mini-Universal MATE-N-LOK pin and socket contacts, 30-22 AWG [.05-.3 mm²]. Two shell sizes (8 or 11) are available, accommodating **from**

1 to 4 and 5 to 9 positions. Featuring high contact density and IP67 sealing, these durable connectors are well suited for many wire-to-wire and wire-to-panel applications.

Test Description	Procedure	Requirements
Maintenance Aging	Contacts removed and reinserted 10 times using applicable tools	No damage to contacts or housings. Contact retention maintained
Contact Retention	Axial load applied to contact to displace to the rear of the connector	Contacts remain in place when subjected to a minimum 10 lb. load*
Dielectric Withstanding Voltage (MIL-STD-1344, Method 3001)	Connectors subjected to 1500 volts rms at sea level	No breakdown or flashover
Thermal Shock	Connectors subjected to five cycles of temperature change (-55°C and +125°C)	No damage
Vibration (MIL-STD-202, Method 204, Test Condition B)	Connectors vibrated (wired and mated). Contacts wired in series with 100 milliamperes flowing during the test	No damage or loosening of parts. No interruption of electrical continuity longer than 10 microseconds
Physical Shock (MIL-STD-202, Method 213A, Test Condition A)	Connectors shocked 50 G (wired and mated). Contacts wired in series with 100 milliamperes flowing during the test	No damage or loosening of parts. No interruption of electrical continuity longer than 10 microseconds
Durability	Connectors mated and unmated 25 times with tin plated contacts and 500 times with gold plated contacts	No wear through damage to plating
Protection Against Solids	a. Test wire is pushed into mated connectors b. Mated connectors subjected to circulating talcum powder	a. Must not touch live parts b. No dust deposits observed on mating surfaces
Protection Against Water	Water is projected through jets against mated connector from any direction and then temporarily immersed in water	No water deposits shall be observed on mating surfaces of contacts or housings
Temperature Life	Mated connectors subjected to a temperature of +125°C for 200 hours	No damage
Insulation Resistance (MIL-STD-1344, Method 3003)	Measurement made between adjacent contacts with connector mated	5000 megohms minimum ambient temperature
Humidity (MIL-STD-202, Method 103, Test Condition B)	Mated connectors subjected to 10 days moisture test	Minimum insulation resistance of 100 megohms

* For size 16 contacts. Size 8 contacts 25 lb. load, min.

Levels of Protection for Electric Operating Material

According to IEC 60529
and IEC 60947, Appendix C

Internal Protection (IP)

Definition:

- **Per IEC 60947, Appendix C –** Pertains to low voltage switchgear and control gear.
- **Per IEC 60529 –** Pertains to degrees of protection provided by enclosures (IP code).

Sample Designation:

(Where x is a numeral value),
i.e. IP 65

IP Codes

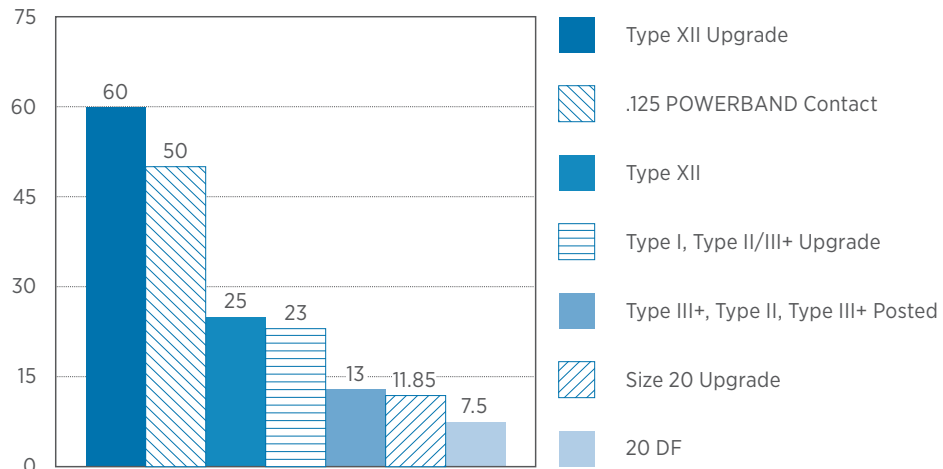

IP Index Letter	X ₁ Degree of Protection against ingress of solid foreign objects		X ₂ Degree of Protection against ingress of water	
	Degree of Protection, X ₁	Protection against ingress of solid foreign objects	Degree of Protection, X ₂	Protection against ingress of water
	0	No Protection	0	No Protection
	1	Protection against objects >50mm diameter – including inadvertently touched by hands	1	Vertical Dripping – Protection against vertical drops of water
	2	Protection against objects >12.5mm – including fingers	2	Dripping <15° – Protection against dripping water when the enclosure is tilted 15° from vertical
	3	Protection against objects >2.5mm diameter including tools	3	Spraying at an angle up to 60° from vertical
	4	Protection against objects >1.0mm diameter – including grains	4	Splashing – Protection against water splashed from any direction
	5	Protection against ingress of solid foreign bodies	5	Jetting – Protection against water stream out of a nozzle, from any direction
	6	Protection against ingress of dust	6	Powerful Jetting – Protection against temporary flooding due to powerful jet streams out of a nozzle from any direction
			7	Temporary immersion – Protection against temporary immersion

Current Carrying Capabilities

The total current capacity of each contact in a given connector is dependent upon the heat rise resulting from the combination of electrical loads of the contacts in the connector arrangement and the maximum ambient temperature in which the connector will be operating. Caution must be taken so that this combination of conditions does not cause the internal temperature of the connector to exceed the maximum operating temperature of the housing material. Several variables which must be considered when determining this maximum current capability for your application are:

- **Wire Size** – Larger wire will carry more current since it has less internal resistance to current flow and generates less heat. The wire also conducts heat away from the connector.
- **Connector Size** – In general, with more circuits in a connector, less current per contact can be carried.
- **Current Load Distribution** – Spreading those lines with greater current loads throughout the connector, particularly around the outer perimeter, will enhance heat dissipation.
- **Ambient Temperature** – With higher ambient temperatures, less current can be carried.

Circular Plastic Connectors (CPC)

CPC comes in six different series to allow you to choose the product best suited to your design requirements

- **Series 1** – Standard Density:
Signals up to 13 A
(also available in Sealed)
- **Series 2** – High Density:
Signals up to 7.5 A
- **Series 3** – Power Density:
Power up to 25 A
- **Series 4** – Power and Signal Combination:
Signals up to 13 A,
Power up to 25 A
- **Series 5** – Power (Sealable):
Power up to 45 A
- **Series 6** – Power and Signal Combination (Sealable):
Signals up to 13 A,
Power up to 45 A

Series 1 (Sealed), 5 and 6 now available in F1 rated material

Circular Plastic Connectors (CPC) enable engineers to design rugged products quickly and affordably by offering a versatile range of power and signal connectivity solutions

Meet rugged and space-saving requirements

- UL94V-0 stabilized heat resistant plastic housings and variants.
- Design for either IP65 or IP67 sealing when needed.
- Eliminate rectangular connector waste when space saving is critical.

Speed up go-to-market and reduce installation time

- Select from a broad portfolio to move from idea to design to production faster.
- Quickly pair power and signal for a variety of input and output requirements when a hybrid approach is needed.
- Select the best contact termination based on application – not the connector. (Hand, semi-automated or automatic termination tooling)

Design with cost-effective, high-performance materials and configuration

- Leverage the lightweight, all-plastic shell as a lower cost alternative to metal.
- Eliminate the cost of hand tools for mating with the connect-disconnect polarized housings.
- Make repair easy with less downtime with removable crimp contacts and replaceable coupling rings.

Circular Plastic Connectors (CPC) offer a rugged, reliable connector system suitable for a wide range of applications. CPC is UL Recognized (File No. E28476) and CSA Certified (File No. LR 7189)

- Industrial machinery, factory automation; material handling equipment
- Rail and Transit vehicles and systems
- Medical Instrumentation & Equipment
- Communication equipment, networking, data storage, computers & peripherals
- HVAC, Commercial and building equipment
- Lighting and signage
- Motor vehicles - Auto/bus/truck; off-road and recreational vehicles; agricultural machinery; construction equipment
- Aerospace and defense equipment and systems

Special CPC Connectors, Square Flange Receptacles, Printed Circuit Board Mount

With Round Posted Contacts (Size 16), Contact Arrangement 17-16

Material and Finish

Housing – Thermoplastic, 94V-0 rated, heat-stabilized, fire-resistant, self-extinguishing, black

Contacts – Brass

Plating –

Connector Part No. 207292-1 – Plated tin over .000050 [0.00127] min. nickel on entire contact

Connector Part No. 207292-2 – Plated .000030 [0.00076] min. gold over .000050 [0.00127] min. nickel on entire contact

Notes:

1. Connector can be used for pressure bulkhead feedthru (sealed) applications.
2. Receptacle is **Standard Sex**, supplied preloaded with 16 special round posted pin contacts, .030 [0.76] diameter.

Signal Contacts, High Current Power Contact – Size 16

The features of the High Current Size 16 contact have been designed to retrofit into the existing AMP Connectors such as CPC (Circular Plastic Connector) and CMC (Circular Metal Connector), G Series, M Series, Metrimate Square Grid and Drawer Connector housings. An initial T-Rise test in free air has shown a 23 amp capability with a 30° T-Rise. The contact may be crimped onto 14 AWG wire with an AMP hand tool **Part No. 601967-1**. Use turret TH502 (**1-601967-6**) for the pin and turret TH501 (**1-601967-5**) for the socket.

Power Contacts, High Current Type XII, Crimp

The Multimate features of the High Current Type XII contact have been designed to fit into the existing AMP Connectors such as CPC (Circular Plastic Connector), CMC (Circular Plastic Metal-Shell Connector), G Series, M Series, and CMPC (Circular Multipin Connector) housings. An initial T-Rise test in free air has shown a 60 amp capability with a 30° T-Rise with 8 gage wires. The contact may be crimped onto 8 AWG wire with a Daniels Hand Tool M310 or AMP P/N 356114-1 and Positioner TP1068 or AMP P/N 356119-1.

Current-Carrying Capacity

The graph shows current-carrying capacity versus temperature rise for a fully energized 3 position CPC plug P/N 206037-2 and receptacle P/N 206036-2. These initial representative amperage ratings were conducted with 8 AWG wires that were 3 feet long.

* Numbers in parentheses specify, in multiples, the minimum quantity of parts that can be ordered.

** Packaging includes two screws: shell size 11, screw length .500 [12.7]; shell sizes 13-23, screw length .625 [15.88].

Notes:

- Clamping areas adjustable by inverting or changing clamping inserts. The quantity of inserts supplied with each assembly is as follows: for size 23 cable clamps, four inserts; for all other cable clamps, two inserts.
- Components for all cable clamps are packaged unassembled. This includes the cable clamp, two screws and the clamping inserts.
- Cable clamps can be threaded directly onto plugs or receptacles, or onto back-shell extenders (page 40).
- Replacement screws are available in the following sizes: 3/8 in. [9.52] – **5019024-1**, 1/2 in. [12.7] – **5019024-2**, 5/8 in. [15.88] – **5019024-3**, 1 in. [25.4] – **5019024-4**, 3/4 in. [19.05] – **5019024-5**.
- Cable clamp inserts not sold separately.

Self-Centering Cable Clamp (Shell Size 23)

The self-centering cable clamp is used in applications where strain relief protection is required and the cable or wire bundle is large and/or stiff.

Material

Black thermoplastic,
UL 94V-0 rated

Part Numbers

207774-3 (individually packaged)

207774-4 (bulk packaged)

Notes:

1. Clamping area is adjustable by inverting clamping inserts; maximum cable diameter is 1.125 [28.58].
2. Components for cable clamp are packaged unassembled. This includes the cable clamp, two screws (1.00 [25.4]) and the clamping inserts.
3. Cable clamp can be threaded directly onto plugs or receptacles, or onto back-shell extenders (page 40).

Right-Angle Cable Clamps

Right-angle cable clamps are used in tight areas where typical 180° cable clamp strain reliefs will not fit.

Material

Black thermoplastic,
UL 94V-0 rated

Back-Shell Extender (Shell Size 23)

A back-shell extender is used with a cable clamp in applications where added length and/or additional wire breakout are required.

Material

Black glass-filled thermoplastic

Part No. 207055-1

Note: Back-shell extenders can be threaded directly onto plugs or receptacles and will accept cable clamps of the appropriate size (pages 38 and 39).

Panel Mount Flanges (Plugs only)

A panel mount flange is used in applications that require the plug half of a connector to be panel mounted.

One-Piece Sealed Circular Plastic Connectors

Product Facts

- Economical environmentally sealed connector designed for industrial applications
- Meets major Industrial Standards
- High strength, impact resistant thermoplastic housing, rated UL 94V-0
- Contains wire entry and peripheral seals
- AMP POWERBAND precision formed power contact (Series 5 and 6)
- Type III+ precision formed signal/low current contacts (Series 1 and Series 6)
- Other configurations in Series 1 can be made available, contact your local TE Connectivity Sales Engineer or TE Connectivity, Harrisburg, PA

The new Sealed One-Piece Circular Plastic Connectors are the latest product innovation to the sealed CPC product family. This design allows for easy assembly. The housing and the seal are attached. A newly designed wire entry seal protects the rear of the connector and a peripheral seal protects the connector interface. Simply crimp the contact onto a wire and insert the crimped wire contact through the seal and into the housing cavity. The connector loads the same as if the seal wasn't there. All connector cavities come in a sealed condition. No plugs are required if you do not use a position cavity.

Industry Standards One-Piece Sealed CPC products meet

- IP 67 (Temporary immersion)

Fluid Protection Against – diesel fuel, gear and engine lubricants, gasoline, anti-freeze, hydraulic fluid, water, salt sprays, etc.

Performance Characteristics

meets the same performance characteristics as shown on page 6.

Operating Temperature Range

-50°C to +125°C [-58°F to +257°F]

UL Voltage Rating

Series 1 600 V (AC or DC)
Series 6 250 V (AC or DC)
.125 POWERBAND Power Contact
– 50 amps, single contact rating
at 30°C T-Rise
Type III+ Contacts –
13 amps, single contact rating at
30°C T-Rise

Flammability Rating

UL 94V-0 rated

Sealing Capability

Per IP 67

Housing Material

High strength, impact resistant thermoplastic

Fluid Resistance

Diesel fuel, gear and engine lubricants, gasoline, anti-freeze, hydraulic fluid, water

¹ For use in One-Piece or Two-Piece Sealed Circular Plastic Connectors (CPC), Series 5 and 6.

‡ Single contact, free-air test current; not to be construed as contact rating current. Use only for testing. Refer to contact current carrying capability information, page 8.

Note: Standard Size 8, High Current Upgrade Size 8, and .125 POWERBAND contacts are **not** interchangeable.

**.125 POWERBAND
Pin Contact**

See pages 17-23 for complete product information and part numbers of Size 16 contacts applicable in Sealed CPC Connectors.

Multimate Size 16 Contacts

Precision formed signal/low current
Pin Diameter – .062 [1.57]
Test Current – 13 amps max.

.125 POWERBAND Contacts

Precision formed high current
Pin Diameter – .125 [3.175]
Test Current – 50 amps max.

Extraction Tool

Part Number 318813-1
(Instruction Sheet 408-4374)

Material and Finish

Contacts – Copper with beryllium copper spring

Plating Code –

A – Post plated .000200
[0.00508] min. silver in mating area with .000050 [0.00127] min. silver on remainder of contact, all over .000050 [0.00127] min. nickel
B – Post plated .000030 [0.00076] min. gold in mating area with gold flash on remainder of contact, all over .000050 [0.00127] min. nickel

Specifically designed for AMP CPC Connectors, Series 5 and 6, the new .125 POWERBAND contact offers the performance of a MIL-Spec screw machined Size 8 contact with the economy of a stamped and formed, strip-feed contact. Strip-feed contacts offer maximum production capabilities using standard AMP bench-mount, semiautomatic termination equipment. For low volume, prototype or maintenance and repair requirements, the .125 POWERBAND contact is available in loose piece form.

UV-Resistant Sealed Circular Plastic Connectors

Product Facts

- Economical environmentally sealed connector designed for industrial applications
- Meets major Industrial Standards
- High strength, impact resistant thermoplastic housing, rated UL 94V-0 or flammability & F1 for UV exposure
- Contains wire entry and peripheral seals
- AMP POWERBAND precision formed power contact (Series 5 and 6)
- Type III+ precision formed signal/low current contacts (Series 1 and Series 6)

One-Piece Sealed CPC using UL F1-rated resin is ideal for UV resistance in outdoor applications. The UL F1 rating meets industry standards for long-term UV exposure, making the housings suitable for outside applications where parts are subject to frequent or extended periods of exposure to sun light. The connectors are sealed to IP67 with no additional enclosure needed to protect the mated connector from water exposure, lowering the cost of installation. Receptacle and plug housings accept Type III+ signal contacts and/or AMP POWERBAND (size 8) contacts. The housings come in three series designed to handle standard signal, power with current up to 50A per contact and combinations of signal and power in the same housing. Mounting options include panel mount and free-hanging.

Industry Standards One-Piece Sealed CPC products meet

- IP 67 (Temporary immersion)

Fluid Protection Against – diesel fuel, gear and engine lubricants, gasoline, anti-freeze, hydraulic fluid, water, salt sprays, etc.

Performance Characteristics

meets the same performance characteristics as shown on page 6.

- Economical environmentally sealed connector designed for industrial applications
- Meets major Industrial Standards
- High strength, impact resistant thermoplastic housing, rated UL 94V-0
- Contains wire entry, peripheral, and full interfacial seals
- AMP POWERBAND precision formed power contact (Series 5 and 6)
- Type III+ precision formed signal/low current contacts (Series 6)

Technical Documents

Instruction Sheet

408-4317 Two-Piece Sealed CPC Connectors

Product Specification

108-1579 Sealed CPC Connectors with Removable Contacts

Test Report – 501-517

Sealed CPC connectors are the latest additions to the growing family of AMP Circular Plastic Connectors. Sealed CPC connectors were developed as part of the Series 5 and 6 product line, specifically to meet the increasing demand for an economical environmentally sealed connector.

Sealed CPC connectors are designed to meet the requirements of UL, CSA, and VDE for environmentally sealed connectors used in industrial applications.

In addition, sealed CPC connectors are designed to meet the latest SAE and ASAE requirements as outlined in the standards listed here.

Sealed CPC connectors incorporated the latest technology in thermoplastic design and use the new AMP POWERBAND precision formed high current contact.

Illustrated above are the Series 5 (power) and Series 6 (power/signal mix) sealed connector configurations.

Industry Standards Two-Piece Sealed CPC connectors meet

- IP 65

Max. Recovered Wall Thickness –

.040 [10.16]

Sealing Range – .250 [6.35]–

.500 [12.70] Dia.

Shell Size 17
Part No. 213933-1

Jacketed Cable Seals (Shell Size 23)

A jacketed cable seal kit provides an environmentally sealed connection for jacketed cable.

Material

Peripheral Seal – Grey elastomer

Collar – Aluminum

Jacketed Cable Seal –

Black rubber

Back-Shell Extender –

Black glass-filled thermoplastic

Special Clamp Saddle –

Black thermoplastic

Note: Jacketed cable seals must be used with large cable clamps and can be used on plugs or receptacles. Large cable clamps are to be ordered separately (see page 38). Each jacketed cable seal kit includes:

- Peripheral Seal – to be discarded if kit is used on plug. Additional seals may be purchased (see page 51)
- Collar – provides bearing surface for back-shell extender
- Jacketed Cable Seal
- Back-Shell Extender
- Special Clamp Saddle – to be used in lieu of clamping insert supplied with large cable clamp

Sealing Range (Dia.)	Kit Number
.300-.450 [7.62-11.43]	207052-1
.450-.600 [11.43-15.24]	207052-2
.600-.875 [15.24-22.22]	207052-3

Rubber Boot

Rubber boots are used with jacketed cable to provide splashproof connections for Series 1 and Series 3 connectors. (Not for Metal Shell Connectors.)

Shell Size	Cable Dia. Sealing Range	Part No.
11	.219-.438 [5.56-11.13]	206304-1

Notes:

1. Rubber boots are recommended for use with jacketed cable and can be used on plugs or receptacles, except Series 2 connectors.
2. For detailed performance data on rubber boots, refer to Product Specification No. 108-10024.

Material

Black neoprene

MIL-C-5015 Style Circular Plastic Connectors

Product Facts

- Intermateable with other manufacturers' Metal-Shell Sizes 20-14 and 18-10, MIL-C-5015 Style Connectors
- High impact resistant plastic housing
- Lighter weight
- Lower cost
- Industry accepted, Type III+ pin and socket contacts, available on reels in strip-form for high volume, low cost, automatic machine terminations
- Contacts also available in loose piece form for low volume, prototype or maintenance and repair
- Housing designed to prevent mismatching with other insert arrangements
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476
- Certified by Canadian Standards Association, File No. LR 7189

This new addition to the AMP Circular Plastic Connector Line is specifically designed to be intermateable with other manufacturers' Metal-Shell sizes 20-14 and 18-10, MIL-C-5015 Style Connector Systems. The high impact resistant plastic housing offers the advantages of lighter weight and lower cost than existing metal shell connectors. In addition, the connector design prevents mismatching when used with other insert arrangements. As part of the AMP Multimate Family of Connectors, the MIL-C-5015 style connector offers the additional economies of crimp Type III+ Pin and Socket contacts in reel-mounted, strip-form for high volume automatic machine termination, as well as in loose piece form for low volume, prototype or maintenance and repair.

Miniature Circular Plastic Connectors

Product Facts

- Two shell sizes: Size 8 (1-4) or Size 11 (5-9) contact positions
- Pre-positioned 1/4 turn coupling ring with positive lock and alignment feature
- Unique contact pattern for each position size helps prevent accidental mating with other position sizes
- Sealed to IP67 (Protected against immersion in water up to 1 meter for 1/2 hour)
- Front or rear jam nut panel mounting
- No assembly required
- Receptacle available in free-hanging or panel mount versions
- Alternate keys available

AMP Miniature Circular Plastic Connectors (CPC) are available in wire-to-wire and wire-to-panel configurations.

Utilizes existing Mini-Universal MATE-N-LOK stamped and formed contacts designed for up to 500 mating cycles when plated with gold or up to 50 cycles with tin plating.

Nylon housings offer good resistance to a wide range of chemical agents while the IP67 sealing helps prevent ingress of dirt or fluids that could have an adverse effect on the contact interface.

Ideal for Industrial, Instrumentation and Transportation applications where size, contact density and environmental exposure are primary concerns.

Metal-Shell Circular Plastic Connectors

Product Facts

- Economical combination of thermoplastic UL 94V-0 rated connector housings and metal shells
- Available in three sizes:
 - Series 1–Accepts Multimate contacts, shell sizes 14-5, 14-7, 22-16, 28-24, and 28-37 standard sex; 14-5, 14-7, 22-14, and 28-37 reverse sex
 - Series 2–Accepts 20 DF and 20 DM contacts, shell sizes 22-28 and 28-63 standard sex; 22-28 and 28-57 reverse sex
 - Series 3–Accepts Type XII power contacts, shell sizes 22-3 and 28-7 standard and reverse sex
 - Series 4–Accepts Multimate contacts, and Type XII power contacts, shell size 28-16M and 28-22M standard sex
- Compatible with MIL Spec metal housing type connectors
- Choice of application tooling to meet all production requirements
- Product Specification: 108-10040
- Test Report: 501-105
- Instruction Sheet: 408-6641

AMP Metal-Shell Circular Plastic Connectors offer the reliability of higher priced all metal connectors at a fraction of the cost, and are offered in the more popular contact configurations. Connector housings are made of lightweight, sturdy, thermoplastic material that are UL 94V-0 rated, with zinc alloy, nickel plated shells for added strength and protection. These connectors are available in a variety of configurations to meet your signal, low current and high current requirements. Operating temperatures range from -55°C to +125°C [-67°F to +257°F].

Signal and low current is provided by a choice of AMP Multimate contacts: .062 [1.57] pin diameter and 20 DF and 20 DM contacts, .040 [1.02] pin diameter. High current requirements are met by the Type XII capable of carrying up to 35 amperes of current. These quick connect/disconnect circular connectors feature polarized housings to prevent mismatching with other insert arrangements. AMP Metal-Shell Circular Plastic Connectors are available in square flange receptacles and freehanging plug connectors.

For additional economy, industry accepted AMP Type III+ pin and socket contacts are available on reels in strip-form for high volume, low cost, automatic machine terminations. For low volume, prototype or maintenance and repair Type III+ contacts are also available in loose piece form.

TETRASEALS Ring

(Installed in Plugs only)

The TETRASEALS Ring provides splashproof sealing between connector metalshells. It is located behind the plug-shell external keys (under the coupling ring).

When mated with a receptacle, the ring is compressed against the inside diameter of the mating end edge of the receptacle shell.

Manual Hand Tools for Interchangeable Die Sets

These tools are ideal for small production, prototype and experimental applications. They are used for terminating pin and socket contacts to wire and feature a ratchet device to provide consistently formed crimps.

SDE (Standard Die Envelope) Die Sets

Standard Die Envelope (SDE) die sets are a commercial grade option that provide cost-effective flexibility and compatibility with a number of different manual hand tool frames including the

PRO CRIMPER III, the SDE Micro Crimp Battery Hand Tool, the SDE bench top Terminator and the 626 Pneumatic Tool System.

For more information, request Catalog **1-1773865-2**.

PRO-CRIMPER III Hand Tool, Part No. 58495-1

Commercial grade hand tool for crimping various products feature a ratchet control system to ensure a complete crimp cycle. Commercial tools accept both pinned- and shouldered style die sets. Locators are provided with

pinned-style die sets for proper contact and wire positioning, and to help minimize contact rotation and bending during crimping. Approximate weight 1.3 lb [0.60 kg].

For use with Type III+ contacts, see pages 17-19.

For more information, request Catalog **1-1773865-2**, Instruction Sheet **408-9819**.

CERTI-CRIMP Straight Action Hand Tools (SAHT)

112076

The CERTI-CRIMP II family of premium hand tools is one of the primary options for wire sizes as large as 14 AWG. When paired with the appropriate contacts the CERTI-CRIMP II tools meet all appropriate 114 application specification feature require-

ments, include adjustable insulation crimp capability, include the CERTI-CRIMP ratchet control system, and ensure a complete crimp cycle. In many cases include wire stops, locators, and straightening features.

For Type III+ contacts, see pages 17-19.

For more information, request Catalog **1-1773864-7**, Instruction Sheet **408-2095**.

CERTI-CRIMP "C" Head Straight Action Hand Tool (SAHT), Part No. 69710-1

92936-8

The CERTI-CRIMP "C" Head Straight Action Hand Tool (PN **69710-1**) is used for larger contacts and wire sizes, also meeting applicable

114 specification feature requirements. Both CERTI-CRIMP II heads and "C" head dies can be used with multiple powered options.

See Catalog **65780** for additional details.

Electric Machine for Interchangeable Die Sets

SDE Terminator, Part No. 1490076-2

112383

An electric crimp terminator with compact design features a die set holder that is compatible with all SDE die sets. Hand- or foot

actuated options are available. CE Approved.

For more information, request Catalog **1654714**.

Pneumatic Hand Tool for Interchangeable Die Sets

626 Pneumatic Tool System

Lightweight, air-operated modular tooling system. Accepts a wide variety of interchangeable heads for crimping various types of contacts, terminals and splices onto wires ranging from 6-26

AWG [13-0.12 mm²], plus coaxial and fiber optic cable. Optional ratchet control available to provide complete crimp cycle.

For subminiature coaxial contacts, see pages 22-23.

For more information, request Catalog **124208**.

Crimp Machines

AMP-O-LECTRIC Model "GII" Terminating Machines, Part Nos. 2217000-1, -9, -11

Semiautomatic bench machines for crimping reeled terminals and contacts, featuring a quiet and reliable direct motor drive, microprocessor controls for ease of setup and operation, and guarding and lighting designed for operator convenience and safety.

All models are equipped with either manual or automatic precision adjustment of crimp height. Machine mounted sensors are available for crimp quality monitoring using conventional miniature-style applicators.

For more information, request Catalog **1-1773736-1**, Catalog **82275** [Crimp Quality Monitor (CQM II)].

Crimp Quality Monitor II (CQM II)

The unique system provides 100% on-the-fly crimp inspection. It measures the crimp height of each termination, and evaluates the quality of each crimp. If a crimp is questionable, the monitor alerts the operator with both visual and audible alarms. It also provides ports for printing

and networking. When used with AMP-O-LECTRIC Model "GII" Termination Machines, the monitor is mounted to the machine. When used with TE Connectivity Lead Making Machines, it is integrated into the machine's operating system.

For more information, request Catalog **82275**.

Call Technical Support for Automatic Machine Applicator Part Numbers.

AMP 3K and AMP 5K Terminating Machines

- 3,000 lb [1361 kg] max. crimp force (AMP 3K); 5,000 lb [2268 kg] max. crimp force (AMP 5K)
- Tool-less removal of applicators and guards
- Jog capability
- Quiet, fast operation – 80/76 dBA and cycle time less than 0.400 seconds
- Accepts Heavy Duty Mini style applicators
- Wide range of optional equipment such as tool-less precision crimp height adjust, batch counter, CQM II capability and work light

The AMP 3K and AMP 5K Terminators are designed for customers that require the increased output and quality of a semiautomatic machine at a competitive price. By incorporating the most commonly requested features as standard and offering a long list of optional equipment, these terminators offer flexibility to meet the specific needs of various applications at the lowest possible cost.

For more information, request Catalog **1654856**.

Applicators

OCEAN Applicator

We standardized our applicator offerings to provide global design consistency and to offer the ultimate flexibility with choices in feeding options. The OCEAN applicator is designed so that all feed options are interchangeable with the common base applicator. Our pneumatic and

mechanical feed options have been completely redesigned. They offer finer, more precise terminal positioning along with quicker adjustability while being much more user friendly. The interchangeability also makes it possible to upgrade to smart applicator technology.

Request catalog **9-1773458-6** for more information.

Stripper-Crimper Machines

Cosmic 60R Wire Stripping Machine, 2047793-1

With just three analogous controls, you can set diameter, stripping length and partial pull-off length. The display shows the cut diameter in 0.01 mm

increments. The processing cycle is easy to trigger: the moment the tip of the conductor touches the release sensor, the stripping process starts automatically.

See catalog **1654956** for more information.

Cosmic 927R Micro-Cable Stripper, 2047789-1

The compact, lightweight, bench top Cosmic 927R was designed and developed to reliably strip various insulation materials and micro-cable. From conductor

diameter 36 to 10 AWG, the stripping diameter display can be set to within 0.1mm increments.

See catalog **1654956** for more information.

Lead Makers

UNIQA-PRO

The UNIQA-PRO Single Crimp Wire Processor is an ideal cost-effective solution for companies looking to ramp up production from multiple bench top machines without making the large capital investment of a

double ended leadmaker. With this single ended-leadmaker, you will be able to save labor costs by measuring, cutting, stripping both ends, and crimping one end of a wire lead all with a single machine.

For more information, request Catalog **1-1773856-5**.

GAMMA 333 PC-V

The flexible design of the Gamma 333 PC-V accommodates space for multiple processing stations in order to handle a wide variety of customer required applications. And, with its large wire

processing range the Gamma 333 PC-V can accommodate cross sections up to 10 AWG with wire lengths up to 213 ft.

See catalog **1-1773861-1** for more information.

Technical Documents

Various technical documents are available for your use:

Product Specifications describe technical performance characteristics and verification tests. They are intended for the Design, Component and Quality Engineer.
