Descriptions

The DIO2102B is an integrated solution for Set-top box and high definition player, and designed to optimize the audio driver circuit performance while reducing the BOM cost by eliminating the peripheral discrete components for noise reduction. DIO2102B features a 3Vrms stereo audio driver that designed to allow for the removal of output AC- coupling capacitors.

Featuring differential input mode, gain range of ± 1 V/V to ± 10 V/V can be achieved via external gain resistor setting. The DIO2102B is able to offer 3Vrms output with 2.5k ohm load and 5V supply.

Meanwhile, the DIO2102B offers built-in shut-down control circuitry for optimal pop-free performance. Under under-voltage condition, DIO2102B is able to detect it and mutes the output.
