

# VSC7440

#### 10-Port L2/L3 Enterprise Gigabit Ethernet Switch with 10 Gbps Links

The next-generation switch family from Microsemi delivers a flexible Enterprise and Industrial Ethernet solution.

The VSC7440 SparX-IV-34<sup>™</sup> device is an SMB/SME Ethernet switch with up to 10 ports supporting a combination of 1G, 2.5G, and 10G Ethernet ports.

The device provides a rich set of Enterprise Ethernet switching features. Using multistage Versatile TCAM technology (VCAP<sup>TM</sup>), it delivers VLAN and QoS processing that enables delivery of differentiated services, security through intelligent frame processing, and egress frame manipulation.

For industrial applications, VSC7440 integrates VeriTime™, Microsemi's patent-pending timing technology that delivers the industry's most accurate IEEE 1588v2 time stamping. Combined with the PTP software and an advanced Servo algorithm, Microsemi offers the most accurate 1588 solution.

A powerful 500 MHz CPU enables full management of a Layer 2 and Layer 3 Ethernet switch solution.

A comprehensive application programming interface (API) and a software development package (SDK) accelerate time-to-market for managed Ethernet applications. The software API package integrates easily with third-party software, preserving existing software investments.

#### **Highlights**

- Up to four 1G, four 2.5G, and two 10G ports
- Up to two integrated copper PHYs and two 10G SerDes
- Fully-managed L2 switching and L3 forwarding features
- Extended temperature range
- Easy upgrade within the SparX-IV family to higher bandwidth (including 10 GbE port support)

## **Applications**

- High-end residential gateway, small-scale 11ac Wi-Fi aggregation
- Fully-managed L2/L3 switch
- SMB/SME Ethernet switches

Microsemi makes no warranty, representation, or guarantee regarding the information contained herein or the suitability of its products and services for any particular purpose, nor does Microsemi assume any liability whatsoever arising out of the application or use of any product or circuit. The products sold hereunder and any other products sold by Microsemi have been subject to limited testing and should not be used in conjunction with mission-critical equipment or applications. Any performance specifications are believed to be reliable but are not verified, and Buyer must conduct and complete all performance and other testing of the products, alone and together with, or installed in, any end-products. Buyer shall not rely on any data and performance specifications or parameters provided by Microsemi. It is the Buyer's responsibility to independently determine suitability of any products and to test and verify the same. The information provided by Microsemi hereunder is provided "as is, where is" and with all faults, and the entire risk associated with such information is entirely with the Buyer. Microsemi does not grant, explicitly or implicitly, to any party any patent rights, licenses, or any other IP rights, whether with regard to such information is entirely by information. Information provided in this document is proprietary to Microsemi, and Microsemi reserves the right to make any changes to the information in this document or to any products and services at any time without notice.

# **VSC7440**

### 10-Port L2/L3 Enterprise Gigabit Ethernet Switch with 10 Gbps Links

#### **Features**

- Four 10/100/1000 ports (up to two integrated copper PHYs)
- Four 10/100/1000/2500 ports
- Two 10/100/1000/2500/10000 ports
- Integrated shared packet memory
- Fully non-blocking wire-speed switching performance for all frame sizes
- 8 QoS classes per port
- Energy Efficient Ethernet (EEE)
- Priority-based control
- Integrated MIPS-24KEc CPU with DDR3 SDRAM controller
- PCle for control/status register access

### Layer 2 Switching

- 802.1Q VLAN switch
- Classify and modify up to three VLAN tags
- 512/256 IPv4/IPv6 multicast groups using snooping
- Policing with storm control and MC/BC protection
- RSTP and MSTP support
- Hardware-and software-based learning
- Link aggregation (IEEE 802.3ad)
- Independent and shared VLAN learning (IVL, SVL)
- Jumbo frame support

## Layer 3 Routing

- 1K/256 IPv4/IPv6 table entries (LPM and hosts)
- 512/256 IPv4/IPv6 (S, G, V) or (\*, G, V)

#### Multicast

- Layer 2
- IPv4 and IPv6
- IGMP and MLD

#### **Industrial Ethernet**

- VeriTime<sup>™</sup> (1588v2) and SyncE support
- Ethernet ring protection switching (ERPS)

## **Key Specifications**

- 19 mm × 19 mm BGA
- -40 °C to 110 °C temperature range

#### **Related Products**

Visit <u>www.microsemi.com</u> for information about these related products:

- SparX-III GbE switches with integrated copperPHYs
- VSC8504 4-port copper PHYs
- Unified API, WebStaX<sup>™</sup>, and SMBStaX<sup>™</sup> software

Microsemi Corporation (Nasdaq: MSCC) offers a comprehensive portfolio of semiconductor and system solutions for aerospace & defense, communications, data center and industrial markets. Products include high-performance and radiation-hardened analog mixed-signal integrated circuits, FPGAs, SoCs and ASICs; power management products; timing and synchronization devices and precise time solutions, setting the world's standard for time; voice processing devices; RF solutions; discrete components; enterprise storage and communication solutions, security technologies and scalable anti-tamper products; Ethernet solutions; Power-over-Ethernet ICs and midspans; as well as custom design capabilities and services. Microsemi is headquartered in Aliso Viejo, Calif., and has approximately 4,800 employees globally. Learn more at www.microsemi.com.
