## Eca Series Dptical Fiber SWitch

## orMe =ac Eeries

## Product Description

Oplink's Eco series optical fiber switches unify different switch configurations of 1x1, Dual 1x1, Quad 1x1, 1x2, 2x2Add/Drop, Full2x2, Dual 1x2, Dual 2x2Add/Drop and Dual Full $2 \times 2$ onto the same package, providing the same PCB-direct-mountable footprint. The switches are built based on Oplink's optical switch patents (Patents US 6215919, US 6873757, China ZL03145439.9). They are designed for network protection, fiber monitoring applications.

Oplink can provide customized designs to meet specialized feature applications. Also, Oplink offers modular assemblies that integrate other components to form a full function module or subsystem.

## Features

$\diamond$ Wide $\lambda$ range, low IL \& crosstalk
$\diamond$ One footprint for all configurations
$\diamond$ Latching and non-latching options
$\diamond$ Compact and direct PCB mounting

## Applications

$\diamond$ Network optical protection
$\diamond$ Network monitoring (use members in Oplink switch family w/ $\geq 10 \mathrm{M}$ durability where frequent switching is needed)
$\diamond$ Instrument, testing and measurement

Notes:

1) Exclude connector loss. IL @ $23^{\circ} \mathrm{C}$, 1310 and/or 1550 nm and all SOP. Add 0.5 dB (max) to for Quad 1x1, Dual $2 \times 2$ A/D, Dual Full $2 \times 2$ and 0.3dB (max) for others type for over operating temperature and wavelength ranges.
2) Based on FOT-34 method $A$, steady state equilibrium launch conditions.
3) Driving voltage pulse duration shall $\geq 20 \mathrm{~ms}$.
