

Surge Protection Made Simple™ for Telecom Applications

IEC Class II Surge Arresters for 48Vac/60Vdc, 75Vac/100Vdc and 120Vac/200Vdc LV Systems

Description

The Cooper Bussmann® IEC Class II 48Vac/60Vdc, 75Vac/100Vdc and 120Vac/200Vdc one-pole, modular surge arresters feature local, *easyID*™ visual indication and optional remote contact signaling. The unique module locking system fixes the protection module to the base part. Modules can be easily replaced without tools by simply depressing the release buttons. Integrated mechanical coding between the base and protection module ensures against installing an incorrect replacement module.

LV System Arresters

The features of these single-pole devices are for use as a single device or in combination with other devices for AC and DC voltage systems.

Remote Signaling Contact

The three-pole terminal remote signaling contact versions have a floating changeover contact for use as a break or make contact, according to circuit concept.
