Piezoelectric Sounders (External Drive SMD Type) Circuit/Notice

■ Circuit

The following are examples of externally driven circuits.

- (1) Unstable multi-vibrator using Tr.
- (2) Circuits using inverters or NAND gates.

■ Notice (Soldering and Mounting)

Washing of the component is not acceptable, because it is not sealed.

■ Notice (Handling)

- 1. The component may be damaged if mechanical stress exceeding specifications is applied.
- 2. Take care to protect operating circuit from surge voltage resulting from excessive force, falling, shock or temperature change.
- 3. If DC voltage is applied to the component, silver migration may occur. Please pay full attention to avoid subjecting the component to DC voltage for long periods.
- 4. The resistor should be used as shown in Fig. A. A suitable resistance value should be chosen, preferably $1k\Omega$ to $2k\Omega$. Instead of this measure, a diode may also be applied as shown in Fig. B.

5. Avoid excessive pulling of lead wire because wire may break or soldering point may come off.
