

DMC1358 COMPOSITE JAM NUT TOOL KIT

**DMC1358 COMPOSITE JAM
NUT TOOL KIT**

The correct application of torque is essential to most connector applications where Jam Nut receptacle connectors are used. The sealing components (usually an "O" ring) must be compressed, but not to the point of damage. Another important consideration when tightening Jam Nuts is the thread strength, especially in the various types of aluminum and composite connectors.

The DMC1358 Jam Nut Tool Kit contains composite jam nut tools sizes .608" to 3.557". In addition, the DMC1358 kit contains illustrated operating instructions for all the tooling included.

Why Composite? A unique process was developed to mold this composite material which contains a higher percentage of fiberglass than is customarily used in conventional molding technology. This makes them as light and as strong as possible. The material will not scratch plating, or damage the finish on cabinets, panels, or bulkheads when used properly.

DMC1358 TOOL AND ACCESSORY LIST

	2	T-Handle Wrenches
	46	Composite Jam Nut Sockets
	4	Aluminum Jam Nut Sockets

TOOL KIT CONFIGURATION

Type of Case	Portable
Number of Cases	1
Color	Red
Type of Construction	Steel/Aluminum
Application	Jam Nut Sockets
Type of Inserts	Unicellular Polyethylene Foam with Die Cut Tool Cavities
