

QUADRUPLE DIFFERENTIAL LINE DRIVER

Check for Samples: [AM26C31](#)

FEATURES

- Meets or Exceeds the Requirements of TIA/EIA-422-B and ITU Recommendation V.11
- Low Power, $I_{CC} = 100 \mu A$ Typ
- Operates From a Single 5-V Supply
- High Speed, $t_{PLH} = t_{PHL} = 7 \text{ ns}$ Typ
- Low Pulse Distortion, $t_{sk(p)} = 0.5 \text{ ns}$ Typ
- High Output Impedance in Power-Off Conditions
- Improved Replacement for AM26LS31
- Available in Q-Temp Automotive
 - High-Reliability Automotive Applications
 - Configuration Control/Print Support
 - Qualification to Automotive Standards

DESCRIPTION/ORDERING INFORMATION

The AM26C31 is a differential line driver with complementary outputs, designed to meet the requirements of TIA/EIA-422-B and ITU (formerly CCITT). The 3-state outputs have high-current capability for driving balanced lines, such as twisted-pair or parallel-wire transmission lines, and they provide the high-impedance state in the power-off condition. The enable functions are common to all four drivers and offer the choice of an active-high (G) or active-low (\bar{G}) enable input. BiCMOS circuitry reduces power consumption without sacrificing speed.

The AM26C31C is characterized for operation from 0°C to 70°C, the AM26C31I is characterized for operation from –40°C to 85°C, the AM26C31Q is characterized for operation over the automotive temperature range of –40°C to 125°C, and the AM26C31M is characterized for operation over the full military temperature range of –55°C to 125°C.

SCHEMATICS OF INPUTS AND OUTPUTS

ABSOLUTE MAXIMUM RATINGS⁽¹⁾

over operating free-air temperature range (unless otherwise noted)

| | | MIN | MAX | UNIT |
|------------------------------------|--|------------|-----------------------|------|
| V _{CC} | Supply voltage range ⁽²⁾ | –0.5 | 7 | V |
| V _I | Input voltage range | –0.5 | V _{CC} + 0.5 | V |
| V _{ID} | Differential input voltage range | –14 | 14 | V |
| V _O | Output voltage range | –0.5 | 7 | |
| I _{IK} I _{OK} | Input or output clamp current | | ±20 | mA |
| I _O | Output current | | ±150 | mA |
| | V _{CC} current | | 200 | mA |
| | GND current | –200 | | mA |
| θ _{JA} | Package thermal impedance ^{(3) (4)} | D package | 73 | °C/W |
| | | DB package | 82 | |
| | | N package | 67 | |
| | | NS package | 64 | |
| | | PW package | 108 | |
| T _J | Operating virtual junction temperature | | 150 | °C |
| T _{stg} | Storage temperature range | –65 | 150 | °C |

- (1) Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
- (2) All voltage values, except differential voltages, are with respect to the network ground terminal.
- (3) Maximum power dissipation is a function of T_{J(max)}, θ_{JA}, and T_A. The maximum allowable power dissipation at any allowable ambient temperature is P_D = (T_{J(max)} – T_A)/θ_{JA}. Operating at the absolute maximum T_J of 150°C can affect reliability.
- (4) The package thermal impedance is calculated in accordance with JESD 51-7.

RECOMMENDED OPERATING CONDITIONS

| | | MIN | NOM | MAX | UNIT |
|-----------------|--------------------------------|----------|-----|-----|------|
| V _{CC} | Supply voltage | 4.5 | 5 | 5.5 | V |
| V _{ID} | Differential input voltage | | ±7 | | V |
| V _{IH} | High-level input voltage | 2 | | | V |
| V _{IL} | Low-level input voltage | | | 0.8 | V |
| I _{OH} | High-level output current | | | –20 | mA |
| I _{OL} | Low-level output current | | | 20 | mA |
| T _A | Operating free-air temperature | AM26C31C | 0 | 70 | °C |
| | | AM26C31I | –40 | 85 | |
| | | AM26C31Q | –40 | 125 | |
| | | AM26C31M | –55 | 125 | |

ELECTRICAL CHARACTERISTICS

over recommended ranges of supply voltage and operating free-air temperature (unless otherwise noted)

| PARAMETER | | TEST CONDITIONS | AM26C31C AM26C31I | | | UNIT |
|---------------------|---|---|----------------------|--------------------|-----------------|----------|
| | | | MIN | TYP ⁽¹⁾ | MAX | |
| V _{OH} | High-level output voltage | I _O = –20 mA | 2.4 | 3.4 | | V |
| V _{OL} | Low-level output voltage | I _O = 20 mA | | 0.2 | 0.4 | V |
| V _{OD} | Differential output voltage magnitude | R _L = 100 Ω, See Figure 1 | 2 | 3.1 | | V |
| Δ V _{OD} | Change in magnitude of differential output voltage ⁽²⁾ | R _L = 100 Ω, See Figure 1 | | | ±0.4 | V |
| V _{OC} | Common-mode output voltage | R _L = 100 Ω, See Figure 1 | | | 3 | V |
| Δ V _{OC} | Change in magnitude of common-mode output voltage ⁽²⁾ | R _L = 100 Ω, See Figure 1 | | | ±0.4 | V |
| I _I | Input current | V _I = V _{CC} or GND | | | ±1 | μA |
| I _{O(off)} | Driver output current with power off | V _{CC} = 0 V _O = 6 V V _O = –0.25 V | | | 100 –100 | μA |
| I _{OS} | Driver output short-circuit current | V _O = 0 | –30 | | –150 | mA |
| I _{OZ} | High-impedance off-state output current | V _O = 2.5 V V _O = 0.5 V | | | 20 –20 | μA |
| I _{CC} | Quiescent supply current | I _O = 0 V _I = 0 or 5 V V _I = 2.4 V or 0.5 V ⁽³⁾ | | | 100 1.5 3 | μA mA |
| C _i | Input capacitance | | | 6 | | pF |

(1) All typical values are at V_{CC} = 5 V and T_A = 25°C.

(2) Δ|V_{OD}| and Δ|V_{OC}| are the changes in magnitude of V_{OD} and V_{OC}, respectively, that occur when the input is changed from a high level to a low level.

(3) This parameter is measured per input. All other inputs are at 0 or 5 V.

SWITCHING CHARACTERISTICS

over recommended ranges of supply voltage and operating free-air temperature (unless otherwise noted)

| PARAMETER | | TEST CONDITIONS | AM26C31C AM26C31I | | | UNIT |
|---|--|----------------------------|----------------------|--------------------|-----|------|
| | | | MIN | TYP ⁽¹⁾ | MAX | |
| t _{PLH} | Propagation delay time, low-to-high-level output | S1 is open, See Figure 2 | 3 | 7 | 12 | ns |
| t _{PHL} | Propagation delay time, high-to-low-level output | | 3 | 7 | 12 | |
| t _{sk(p)} | Pulse skew time (t _{PLH} – t _{PHL}) | S1 is open, See Figure 2 | | 0.5 | 4 | ns |
| t _{r(OD)} , t _{f(OD)} | Differential output rise and fall times | S1 is open, See Figure 3 | | 5 | 10 | ns |
| t _{PZH} | Output enable time to high level | S1 is closed, See Figure 4 | | 10 | 19 | ns |
| t _{PZL} | Output enable time to low level | | | 10 | 19 | |
| t _{PHZ} | Output disable time from high level | S1 is closed, See Figure 4 | | 7 | 16 | ns |
| t _{PLZ} | Output disable time from low level | | | 7 | 16 | |
| C _{pd} | Power dissipation capacitance (each driver) ⁽²⁾ | S1 is open, See Figure 2 | | 170 | | pF |

(1) All typical values are at V_{CC} = 5 V and T_A = 25°C.

(2) C_{pd} is used to estimate the switching losses according to P_D = C_{pd} × V_{CC}² × f, where f is the switching frequency.

ELECTRICAL CHARACTERISTICS

over recommended ranges of supply voltage and operating free-air temperature (unless otherwise noted)

| PARAMETER | | TEST CONDITIONS | AM26C31Q AM26C31M | | | UNIT |
|---------------------|---|---|----------------------|--------------------|-------------|----------|

(1) The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSOLETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

(5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

(6) Lead/Ball Finish - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead/Ball Finish values may wrap to two lines if the finish value exceeds the maximum column width.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

OTHER QUALIFIED VERSIONS OF AM26C31, AM26C31M :

- Catalog: [AM26C31](#)
- Enhanced Product: [AM26C31-EP](#), [AM26C31-EP](#)
- Military: [AM26C31M](#)

NOTE: Qualified Version Definitions:

- Catalog - TI's standard catalog product
- Enhanced Product - Supports Defense, Aerospace and Medical Applications
- Military - QML certified for Military and Defense Applications

 - This package can be hermetically sealed with a metal lid.
 - Falls within JEDEC MS-004

D (R-PDSO-G16)

PLASTIC SMALL OUTLINE

NOTES:

- A. All linear dimensions are in inches (millimeters).
- B. This drawing is subject to change without notice.
- $\triangle C$ Body length does not include mold flash, protrusions, or gate burrs. Mold flash, protrusions, or gate burrs shall not exceed 0.006 (0,15) each side.
- $\triangle D$ Body width does not include interlead flash. Interlead flash shall not exceed 0.017 (0,43) each side.
- E. Reference JEDEC MS-012 variation AC.

D (R-PDSO-G16)

PLASTIC SMALL OUTLINE

- NOTES:
- A. All linear dimensions are in millimeters.
 - B. This drawing is subject to change without notice.
 - C. Publication IPC-7351 is recommended for alternate designs.
 - D. Laser cutting apertures with trapezoidal walls and also rounding corners will offer better paste release. Customers should contact their board assembly site for stencil design recommendations. Refer to IPC-7525 for other stencil recommendations.
 - E. Customers should contact their board fabrication site for solder mask tolerances between and around signal pads.

PW (R-PDSO-G16)

PLASTIC SMALL OUTLINE

4040064-4/G 02/11

- NOTES:
- A. All linear dimensions are in millimeters. Dimensioning and tolerancing per ASME Y14.5M-1994.
 - B. This drawing is subject to change without notice.
 - C. Body length does not include mold flash, protrusions, or gate burrs. Mold flash, protrusions, or gate burrs shall not exceed 0,15 each side.
 - D. Body width does not include interlead flash. Interlead flash shall not exceed 0,25 each side.
 - E. Falls within JEDEC MO-153

PW (R-PDSO-G16)

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have **not** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
