

PCIe-8560/PXI-8565

PCI Express Control of PXI/CompactPCI

Introduction

The PCI Express-to-PXI/CompactPCI expansion kit provides control of PXI/CompactPCI modules installed in a PXI/CompactPCI expansion system using high-bandwidth PCI Express technology. With comprehensive hardware and software transparency, the expansion kit enables fast and convenient detection of any installed PXI/CompactPCI cards in the expansion system, without requiring additional drivers or software installation.

Controlling PXI™/CompactPCI® with PCI Express®

The PCIe-8560 and PXI-8565 PCI Express-to-PXI/CompactPCI expansion kit provides additional PXI slots to the host computer by implementing a PCI Express-based control of PXI/CompactPCI modules. The technology consists of a PCIe-8560 card installed in the host computer, a shielded cable, and the expansion system with the 3U (Eurocard) PXI-8565 expansion module. The PCIe-8560 comes in a PCI Express x1 footprint and converts PCI Express signals to a PCI bridge that supports seven 32-bit/66 MHz PXI/CompactPCI modules.

Controlling 6U CompactPCI®/PXI™ Modules

For applications requiring control of 6U PXI or CompactPCI modules through PCI Express, ADLINK provides the PXI-8565/6U, the 6U version of PXI-8565. The PXI-8565/6U provides the exact same features as PXI-8565 but in a 6U CompactPCI/PXI form factor. The product package includes one PCIe-8560 to plug into a host PC, one PXI-8565/6U for the remote 6U CompactPCI/PXI chassis, and one ACL-EXPRESS-1/3/7 expansion cable.
