

Platinum temperature sensor in thin-film technology

M 411 ax

M 411ax platinum temperature sensors have axial leads. They are characterized by their small design, short contact times, long-term stability and excellent precision over a wide temperature range and compatibility. They are typically used in the automotive, white goods, HVAC and energy generation industries as well as in medical and industrial appliances and machinery.

Nominal Resistance R0	Tolerance DIN EN 60751 1996-07	Tolerance DIN EN 60751 2009-05	Order Number Plastic Box
100 Ohm at 0°C	Class B	F 0.3	32 208 209

The measuring point for the nominal resistance is defined at 8/13 mm from the end of the sensor
