

High-Voltage Oscilloscope Probe, 10kV, 50MHz

Features and Specification:

- X1000 Attenuation
- 100M ohms / 1pF Input Impedance
- 50MHz Bandwidth
- 80" (2.0m) Cable Length

Product Description:

If the voltages you need to measure are above the specifications of the general purpose probe, B+K Precision has higher voltage probes for you.
