|-----------------------|---------------|--|
| Electrical connection | Wires         |  |
| Length of lead wire   | L = 365 mm    |  |
| Tolerance             | +/- 10,0 mm   |  |
| Length of tube        | S = 10 mm     |  |
| Tolerance             | +/- 2,0 mm    |  |
| Wire gauge (AWG)      | 18 22         |  |
| Insulation diameter   | 1,7 mm 2,2 mm |  |
| Contact               | see drawing   |  |

|        | Colour | Operation |
|--------|--------|-----------|
| Wire 1 | red    | + UB      |
| Wire 2 | blue   | - GND     |
| Wire 3 | violet | PWM       |
| Wire 4 | white  | Tacho     |

The auxiliaries shown on the schematic diagram (which are required for the intended use) are not part of our delivery.

Lead wire 1 - 2: AWG18 (Insulation diameter 2,20 mm)  
 Lead wire 3 - 4: AWG22 (Insulation diameter 1,70 mm)

### 3 Operating Data

#### 3.1 Operating Data - Electrical Interface - Input

|               |     |
|---------------|-----|
| Control input | PWM |
|---------------|-----|

#### Features

|                 |                |                                  |
|-----------------|----------------|----------------------------------|
| Input type      | Open collector |                                  |
| PWM - Frequency |                | 1 kHz - 20 kHz<br>Typical: 2 kHz |

|                 |                                                                                                                                     |
|-----------------|-------------------------------------------------------------------------------------------------------------------------------------|
| Characteristics | <p>Drehzahl / speed [1/min]</p> <p>PWM [%]</p>                                                                                      |
| Schematics      | <p>Lüfter / Fan</p> <p>Kunde / Customer</p> <p>+ UB</p> <p>+ Interne Ref. / + Internal ref.</p> <p>Eingang / Input</p> <p>- GND</p> |

The shown pull-up resistor to the internal reference voltage (+5V) has 4.7kOhm.

#### Information to the curve:

0% - <=7% PWM: 0 1/min (Fan off)

|                 |                                                   |
|-----------------|---------------------------------------------------|
| 7% PWM:         | 1.000 1/min (Start-up, comming from 0% PWM)       |
| 7% - 10 % PWM:  | 1.000 1/min (corresp. to min fan speed)           |
| 10% - 90% PWM:  | Linear increasing curve                           |
| 90% - 100% PWM: | 9.200 1/min (corresp. to max fan speed)           |
| 5% PWM:         | 800 1/min or 0 1/min (Fan turns off, comming from |
| 100% PWM)       |                                                   |

**Transistor Requirements:**

VCE max.  $\geq 12V$   
Isink max  $> 5mA$   
VCEsat  $< 0,15V$

### 3.2 Electrical Operating Data

Measurement conditions: Normal air density = 1,2 kg/m<sup>3</sup>; Temperature 23°C +/- 3°C; Motor axis horizontal; warm-up time before measuring 5 minutes (unless otherwise specified). In the intake and outlet area should not be any solid obstruction within 0,5 m.

$\Delta p = 0$ : corresp. to free air flow (see section 3.5)  
 I: corresp. to arithm. mean current value

| Name     | Condition           |
|----------|---------------------|
| PWM 0001 | PWM: 95 %; f: 2 kHz |

| Features            | Condition      | Symbol | Values      |             |             |
|---------------------|----------------|--------|-------------|-------------|-------------|
| Voltage range       | $\Delta p = 0$ | U      | 36,0 V      |             | 72,0 V      |
| Nominal voltage     | $\Delta p = 0$ | $U_N$  |             | 48,0 V      |             |
| Power consumption   | $\Delta p = 0$ | P      | 106,0 W     | 150,0 W     | 155,0 W     |
| Tolerance           | PWM 0001       |        | +/- 10,0 %  | +/- 10,0 %  | +/- 10,0 %  |
| Current consumption | $\Delta p = 0$ | I      | 3.000 mA    | 3.100 mA    | 2.150 mA    |
| Tolerance           | PWM 0001       |        | +/- 10,0 %  | +/- 10,0 %  | +/- 10,0 %  |
| Speed               | $\Delta p = 0$ | n      | 8.300 1/min | 9.200 1/min | 9.200 1/min |
| Tolerance           | PWM 0001       |        | +/- 7,5 %   | +/- 5,0 %   | +/- 5,0 %   |

#### >90% PWM; f = 2 kHz or broken lead wire (open control input)

Built into the fan is an additional under- and overvoltage control, which switches the power stage and the fan off if the following conditions are reached.

At  $U \leq 30 \text{ V}$  and / or  $U \geq 78 \text{ V}$  is  $n = 0 \text{ 1/min}$

Optionally tests operate at  $U \leq 30 \text{ VDC}$  only.

#### Measured values at 24°C:

$U_{ON} = 32 \text{ V}$ ;  $U_{OFF} = 29,5 \text{ V}$

$U_{ON} = 75,5 \text{ V}$ ;  $U_{OFF} = 77,5 \text{ V}$

The values depends on temperature and fan speed, i. e. they may differ minimal and provide a basis.

| Name     | Condition           |
|----------|---------------------|
| PWM 0002 | PWM: 50 %; f: 2 kHz |

| Features            | Condition      | Symbol | Values      |             |             |

| Efficiency grade                   | 40          |
| Power input                        | 245 W       |
| Speed                              | 9.360 1/min |

All values measured in optimum energy efficiency point.

Productiondatecode is printed on the fan label.

### 3.6 Aerodynamic

Measurement conditions: Measured with a double chamber intake rig acc. to DIN EN ISO 5801.  
 Normal air density = 1,2 kg/m<sup>3</sup>; Temperature 23°C +/- 3°C;  
 In the intake and outlet area should not be any solid obstruction within 0,5 m.  
 The information is only valid under the specified test conditions and may be changed by the installation conditions. If there are deviations from the standard test conditions, the characteristic values must be checked under the installed conditions.

a.) Operation condition:

|                              |                    |  |  |
|------------------------------|--------------------|--|--|
| 9.200 1/min at free air flow | PWM 95 %; f: 2 kHz |  |  |
|------------------------------|--------------------|--|--|

|                                                                   |                         |  |
|-------------------------------------------------------------------|-------------------------|--|
| Max. free-air flow ( $\Delta p = 0$ / $\dot{V} = \text{max.}$ )   | 930,0 m <sup>3</sup> /h |  |
| Max. static pressure ( $\Delta p = \text{max.}$ / $\dot{V} = 0$ ) | 1.310 Pa                |  |

### 3.7 Sound Data

Measurement conditions: Sound pressure level: 1 Meter distance between microphone and the air intake.  
 Sound power level: Acc. to DIN 45635 part 38 (ISO 10302)  
 Measured in a semianchoic chamber with a background noise level of  $L_p(A) < 5 \text{ dB(A)}$   
 For further measurement conditions see section 3.5

a.) Operation condition:

|                              |                    |           |           |
|------------------------------|--------------------|-----------|-----------|
| 9.200 1/min at free air flow | PWM 95 %; f: 2 kHz | PWM min.: | PWM max.: |
|------------------------------|--------------------|-----------|-----------|

|                                                                 |                    |  |
|-----------------------------------------------------------------|--------------------|--|
| Optimal operating point                                         | 910,0 m3/h @ 34 Pa |  |
| Sound power level at the optimal operating point                | 8,6 bel(A)         |  |
| Sound pressure level at free air flow, measured in rubber bands | 75,0 dB(A)         |  |

## 4 Environment

### 4.1 General

|                                            |        |  |
|--------------------------------------------|--------|--|
| Min. permitted ambient temperature TU min. | -20 °C |  |
| Max. permitted ambient temperature TU max. | 75 °C  |  |
| Min. permitted storage temperature TL min. | -40 °C |  |
| Max. permitted storage temperature TL max. | 80 °C  |  |

### 4.2 Climatic requirements\*)

|                       |                                                               |  |
|-----------------------|---------------------------------------------------------------|--|
| Humidity requirements | humid heat, constant; according to DIN EN 60068-2-78, 14 days |  |
| Water exposure        | None                                                          |  |
| Dust requirements     | None                                                          |  |
| Salt fog requirements | None                                                          |  |

\*) Permitted application area:

The product is intended for use in sheltered rooms with controlled temperature and controlled humidity. Directly exposure to water must be avoided.

Pollution degree 1 (according DIN EN 60664-1)

There is either no pollution or it occurs only dry, non-conductive pollution. The pollution has no negative impact. Please require severity levels and specification parameters from the responsible development departments

## 5 Safety

### 5.1 Electrical Safety

|                                                                                                                                                                                                                                                                                                                                                                                           |                                            |  |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|--|
| Dielectric strength<br>DIN EN 60950 (VDE 0805) and DIN EN 60335 (VDE 0700)<br>A.) | clearance / creepage distance                                                                                                                                                                                                                                                                                                                                                             | 1,0 mm / 1,5 mm                            |  |
| Protection class                                                                                                                                                                                                                                                                                                                                                                          | I                                          |  |

### 5.2 Approval Tests

|     |                                                                               |
|-----|-------------------------------------------------------------------------------|
| CE  | No                                                                            |
| UL  | Yes / UL audited by CSA according to UL507, Electric Fans                     |
| VDE | Yes / Approval acc. to EN 60950 (VDE 0805) - Information technology equipment |
| CSA | Yes / C22.2 No. 113 Fans and Ventilators                                      |
| CCC | Yes / GB 12350 Safety Requirements for small Power Motors                     |

The approval tests are observed to:

U approval max.: 72,0 V @ TU approval max.: 75,0 °C

## 6 Reliability

### 6.1 General

|                                   |           |  |
|-----------------------------------|-----------|--|
| Life expectancy L10 at TU = 40 °C | 52.500 h  |  |
| Life expectancy L10 at TU max.    | 20.000 h  |  |
| Life expectancy L10 Delta (40 °C) | 105.000 h |  |
