

Chip Quik® INTRODUCES a NEW Product

Type-5 Solder Paste in 10cc Syringes For Fine Pitch Soldering

Powder Distribution Type-5

Micron Size 25 - 15

Pitch Requirement < 12 mil

Type-T5 Solder Paste Available in 10cc Syringes

SMD291AX10T5 Chip Quik Sn63/Pb37 No Clean Solder Paste T5 mesh 10cc Syringe

SMD291SNL10T5 Chip Quik Lead-Free SAC 305 Solder Paste T5 Mesh 10cc Syringe

SMD4300AX10T5 Chip Quik Sn63/Pb37 Water Washable Solder Paste T5 mesh 10cc Syringe

SMD4300SNL10T5 Chip Quik SAC 305 Water Washable Solder Paste T5 mesh 10cc Syringe

SMDLTLP10T5 Chip Quik Lead-Free Low Temperature Solder Paste T5 mesh 10cc Syringe

5 New Part Numbers

Latest Industry Demands

With the newer PCB's we are now faced with fine pitch components in denser areas. Rework, Soldering & Stencil Printing have become even more challenging. Yet the need for hand soldering, hand dispensing and manual printing still exists. The new Chip Quik Solder Paste Type -T5 allows dispensing through smaller apertures. Now Solder paste with smaller particles can manually be dispensed for components with less than 12mil pitch.

New Dispensing Tips Are Now Available

With Type-5 Solder Paste we now have a need for a smaller aperture Dispensing Tip. To fill this need Chip Quik has introduced a new Industrial Dispensing Tip Assortment.

Part # SMDTA200 (200 Assorted Tips)
