Pass-Through I/O Panels

PT Series Audio Pass-Through I/O Panels are a perfect solution for anyone requiring front-of-rack access to their I/O's in any permanent or mobile studio environment. All versions are hard-wired to two DB25 back panel connectors utilizing the TASCAM DTRS standard pinout.

Features & Benefits:
-Front-of-rack access to the back of your rack.
-Input/Output module for any piece of equipment utilizing DB25,
 1/4" TS/TRS, or Male/Female XLR connections (i.e. audio consoles,
 mic-pre's, channel strips, outboard gear, etc.).
-Increase the lifespan of expensive pieces of equipment by preserving
 their input/output connectors insertion/withdrawal cycle limitations.
-Hard-wired using 110 Ohm AES/EBU digital audio cable...ideal for analog
 or AES/EBU digital audio.
-DB25 connectors are wired to the TASCAM DTRS pinout.

Made in Chicago, USA 🇺🇸
