

Series 70

Characteristics

The Series 70 consists of special short stroke pushbuttons for use with membrane keyboards. It is particularly suited for:

- PCBs

The use of single LEDs ensures that the entire control panel is very well illuminated. The module is offered in six colours and in a round or square design.

Functions

The Series 70 incorporates the following functions:

- Indicator
- Pushbutton
- Illuminated pushbutton

Market segments

The EAO Series 70 is especially suited for applications in the segments:

- Machinery and Automation
- Medicinal technology
- Laboratory and measuring equipment

Please refer to the EAO website to obtain detailed information regarding this series www.products.eao.com

70 PCB pushbuttons

Illumination element

Product can differ from the current configuration.

Dimensions

Equipment consisting of (schematic overview)

**Lens**
page 684

**LED**

**Illumination element**

Each Part Number listed below includes all the black components shown in the 3D-drawing.

To obtain a complete unit, please select the red components from the pages shown.

Additional Information

- The customer has to decide what series resistor shall be used to the LED
- Dimensions with fitted lens see details «Lens»
- Luminosity and wave length variations caused by LED manufacturing processes may cause slight differences regarding the illumination

LED colour	Forward voltage typ.	Lumi. intensity	Dom. wavelength	Terminal	Part No.	Component layout	Wiring diagram	Weight
 Illumination element								
Single-LED red	2.1 VDC @ 20 mA	200 mcd	625 nm	PCB	70-820.2	3	2	0.001 kg
Single-LED orange	2.1 VDC @ 20 mA	220 mcd	590 nm	PCB	70-820.3	3	2	0.001 kg
Single-LED yellow	3.3 VDC @ 30 mA	500 mcd	570 nm	PCB	70-820.4	3	2	0.001 kg
Single-LED green	3.5 VDC @ 20 mA	250 mcd	525 nm	PCB	70-820.5	3	2	0.001 kg
Single-LED blue	3.5 VDC @ 20 mA	450 mcd	470 nm	PCB	70-820.6	3	2	0.001 kg
Single-LED white	3.3 VDC @ 20 mA	600 mcd	x=0.29/y=0.31 nm	PCB	70-820.9	3	2	0.001 kg
 Illumination element								
Bi-colour red/green	2.0/3.2 VDC @ 20 mA	310/800 mcd	625/528 nm	PCB	70-820.25	3	1	0.001 kg
Bi-colour yellow/green	2.0/3.2 VDC @ 20 mA	350/750 mcd	591/528 nm	PCB	70-820.45	3	1	0.001 kg

70 Technical data

Switching element illuminated

Switching system

Short-travel switching system with two independent contact points and tactile operation. Guarantees reliable switching even of very light loads.

1 normally open contact

Contact resistance

≤ 100 mΩ

as per 500 000 cycles of operation at 12 VDC, 5 mA resistive load ≤ 200 mΩ

Electrical life

≥ 500 000 operations at 42 VDC, 50 mA, as per IEC 60512-5-9c
When attention is paid to the direction of current flow from terminal 3/4 to 1/2 the electrical life can be prolonged.

Material

Material of contact

Gold (Au)

Switch rating

max. 2 VA (resistive load)

Switching element

Thermoplastic Polyester (PET, PBT) and Polyacetale (POM)

Switch rating

Switching voltage VDC/VAC	min. 50 mV	max. 42 V
Switching current VDC/VAC	min. 10 µA	max. 100 mA
Power rating	max. 2 W	

Mechanical characteristics

Actuating force

with overlay foil 4 N ±1,5 N

Max. actuating force > 50 N, as per DIN 42115

Electric strength

500 VAC, 50 Hz, 1 min, as per IEC 60512-2-4a

Actuating travel

0.4 mm

Environmental conditions

Storage temperature

-40 °C ... +85 °C

Rebound time

≤ 1 ms

Operating temperature

-25 °C ... +70 °C

Resistance to heat of soldering

260 °C, 5 s, as per IEC 60068-2-20

Mechanical lifetime

> 5 million operations

Electrical characteristics

Contact resistance

Starting value (initial) ≤ 100 mΩ, as per IEC 60512-2-2b

Isolation resistance

≥ 1000 MΩ

Switching element non-illuminated Part No. 70-100.0 and 70-101.0

Switching system

Short-travel switching system with two independent contact points and tactile operation. Guarantees reliable switching even of very light loads.

1 normally open contact

Mechanical characteristics

Actuating force

with overlay foil 5 N ±2 N

Max. actuating force >50 N, as per DIN 42115

Actuating travel

0.3 mm

Material

Material of contact

Silver (Ag)

Rebound time

≤ 5ms

Mechanical lifetime

> 1 million operations

Electrical characteristics

Isolation resistance

≥ 50 MΩ

Contact resistance

≤ 100 mΩ

as per 500 000 cycles of operation at 12 VDC, 5 mA resistive load ≤ 200 mΩ

Electrical life

at 5 VDC, 1 mA > 1 million operations

at 24 VDC, 1 mA > 100 000 operations

Switch rating

≤ 1 VA (resistive load)

Switch rating

≤ 24 VDC, ≤ 50 mA

Electric strength

250 VAC for 1 min.

Environmental conditions

Storage temperature

-30 °C ... +85 °C

Operating temperature

-20 °C ... +70 °C

Switching element non-illuminated Part No. 70-201.0

Switching system

Short-travel switching system with two independent contact points and tactile operation. Guarantees reliable switching even of very light loads.

1 normally open contact

70 Application guidelines

Suppressor circuits

When switching inductive loads such as relays, DC motors, and DC solenoids, it is always important to absorb surges (e.g. with a diode) to protect the contacts. When these inductive loads are switched off, a counter emf can severely damage switch contacts and greatly shorten lifetime.

Fig. 1 shows an inductive load with a free-wheeling diode connected in parallel. This free-wheeling diode provides a path for the inductor current to flow when the current is interrupted by the switch. Without this free-wheeling diode, the voltage across the coil will be limited only by dielectric breakdown voltages of the circuit or parasitic elements of the coil. This voltage can be kilovolts in amplitude even when nominal circuit voltages are low (e.g. 12VDC) see Fig. 2.

The free-wheeling diode should be chosen so that the reverse breakdown voltage is greater than the voltage driving the inductive load. The DC blocking voltage (VR) of the free-wheeling diode can be found in the datasheet of a diode. The forward current should be equal or greater than the maximum current flowing through the load.

To get an efficient protection, the free-wheeling diode must be connected as close as possible to the inductive load!

Switching with inductive load
