

TSL257

High-Sensitivity Light-to-Voltage Converter

General Description

The TSL257 is a high-sensitivity low-noise light-to-voltage optical converter that combines a photodiode and a transimpedance amplifier on a single monolithic CMOS integrated circuit. Output voltage is directly proportional to light intensity (irradiance) on the photodiode. The TSL257 has a transimpedance gain of 320M Ω . The device has improved offset voltage stability and low power consumption and is supplied in a 3-lead clear plastic sidelooker package with an integral lens. When supplied in the lead (Pb) free package, the device is RoHS compliant.

- Converts Light Intensity to Output Voltage
- Monolithic Silicon IC Containing Photodiode, Operational Amplifier, and Feedback Components
- High Sensitivity
- Single Voltage Supply Operation (2.7V to 5.5V)
- Low Noise (200 μ Vrms Typ to 1kHz)
- High Power-Supply Rejection (35dB at 1kHz)
- Compact 3-Leaded Plastic Package
- RoHS Compliant (-LF Package Only)

Absolute Maximum Ratings

Stresses beyond those listed under [Absolute Maximum Ratings](#) may cause permanent damage to the device. These are stress ratings only. Functional operation of the device at these or any other conditions beyond those indicated under [Operating Conditions](#) is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

	Reflow solder, in accordance with J-STD-020C or J-STD-020D (SM Package)		260	°C

Note(s):

1. All voltages are with respect to GND.

Electrical Characteristics

All limits are guaranteed. The parameters with min and max values are guaranteed with production tests or SQC (Statistical Quality Control) methods.

Operating Conditions

All defined tolerances for external components in this specification need to be assured over the whole operation condition range and also over lifetime.

I_{DD}	Supply current	$E_e = 1.54\mu\text{W}/\text{cm}^2$, $\lambda_p = 470\text{nm}$ ⁽⁴⁾		1.9	3.5	mA

Note(s):

1. Measured with $R_L = 10\text{k}\Omega$ between output and ground.
2. Optical measurements are made using small-angle incident radiation from a light-emitting diode (LED) optical source.
3. The input irradiance is supplied by a GaN/SiC light-emitting diode with the following characteristics: peak wavelength $\lambda_p = 428\text{nm}$, spectral halfwidth $\Delta\lambda_{1/2} = 65\text{nm}$.
4. The input irradiance is supplied by an InGaN light-emitting diode with the following characteristics: peak wavelength $\lambda_p = 470\text{nm}$, spectral halfwidth $\Delta\lambda_{1/2} = 35\text{nm}$.
5. The input irradiance is supplied by a GaP light-emitting diode with the following characteristics: peak wavelength $\lambda_p = 565\text{nm}$, spectral halfwidth $\Delta\lambda_{1/2} = 28\text{nm}$.
6. The input irradiance is supplied by an AlGaAs light-emitting diode with the following characteristics: peak wavelength $\lambda_p = 645\text{nm}$, spectral halfwidth $\Delta\lambda_{1/2} = 25\text{nm}$.
7. Irradiance responsivity is characterized over the range $V_O = 0.1\text{V}$ to 4.5V . The best-fit straight line of Output Voltage V_O versus Irradiance E_e over this range will typically have a positive extrapolated V_O value for $E_e = 0$.
8. Power supply rejection ratio PSRR is defined as $20 \log (\Delta V_{DD}(f)/\Delta V_O(f))$ with $V_{DD}(f = 0) = 5\text{V}$ and $V_O(f = 0) = 2\text{V}$.

RoHS Compliant & ams Green Statement

RoHS: The term RoHS compliant means that ams AG products fully comply with current RoHS directives. Our semiconductor products do not contain any chemicals for all 6 substance categories, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, RoHS compliant products are suitable for use in specified lead-free processes.

ams Green (RoHS compliant and no Sb/Br): ams Green defines that in addition to RoHS compliance, our products are free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material).

Important Information: The information provided in this statement represents ams AG knowledge and belief as of the date that it is provided. ams AG bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. ams AG has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. ams AG and ams AG suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.
